

Knobsets

TESA

ASSA ABLOY

Specialists and leaders in knobsets

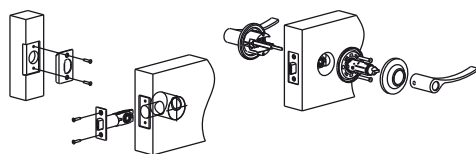

More than 40 years manufacturing locksets have made of [TESA](#) an unavoidable reference in the market for the most widely spread type of lock in

the world: the lockset, a very simple, easy-to-install product with endless possibilities.

Easy to install

TESA's lockset is a very easy to install product. In 3 steps we can equip the door and have it perfectly ready to operate.

Wide range of functions and finishes

With a 40-year experience in the manufacturing of locksets, **TESA** can offer you the widest range of finishes and functions required in every case. Free passage doors, doors that require privacy, doors to be controlled with a key, pull handles and many others have proven to meet the market's demands while being at the same time subject to the requisites of each finish.

Brass, chrome, nickel, black, white finishes... all of them carefully conceived to last many years.

Masterkeyings and security cylinders

Do you want control, comfort and security in one lockset?

Don't hesitate to choose a masterkeying with our dimple key security cylinders. A masterkeying will allow you to open more than one door, restrict the access of certain users to certain doors and rely on the security that you need, using a very limited number of keys (or even just one, if necessary).

Dimensions are in mm.

Replacement

The great advantage of locksets is the possibility of changing and updating the aesthetics of the door as well as the finish or the function installed in it with no need to mechanize the door again; just replacing the lock with a new one will be enough.

Certified products

TESA's lockset is not only a simple, easy-to-install product; it's also highly resistant, with a very lasting fixing. This is borne out by the meeting of the **ANSI** and **UL** standards, which are proof of the high level of resistance and durability of the product even in cases of fire.

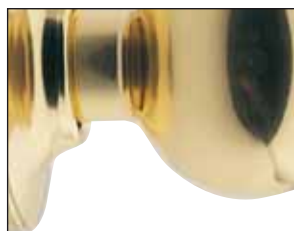

Guaranteed by tesa

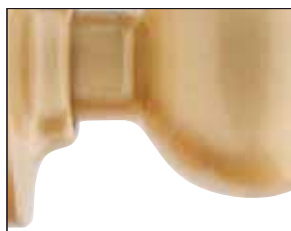

To buy **TESA** is a quality guarantee. **TESA's** lockset is a totally reliable product, whose manufacturing and design provide the maximum guarantee of quality and environmental awareness, accredited by the ISO 9001 and ISO 14001 certifications and the Security at Work and Occupational Hazard Prevention standard.

Key-in-lever locksets

Squaring the advantages

- » Multifunctional mechanism for knob or lever, with high component robustness and soft operation.
- » High-end commercial and residential applications.

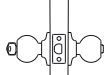

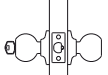

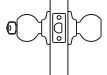

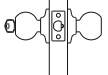

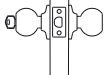

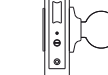

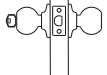

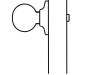

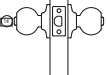

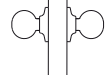

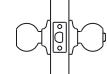

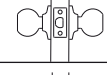

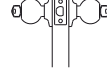

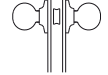

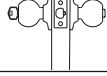

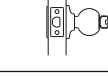

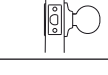

Features

Technical features	Anti-thrust security pin for functions 10, 11 and 12.	Panic release system: in key models, even when locked, the door can always be opened from inside.
Resistencia anti-corrosión s/ASTM B 117/90	CR,CM,NS....144 hours LP,LM.....96 hours	
Espesor puerta	33-45 mm for handles. 33-52 mm for knobs.	Up to 75 mm
	Except function 07: 40-50mm	
ANSI A156.2	Grade 2: 400.000 cycles.	
UL		Hasta 1,5 horas de exposición al fuego
Cilindro	5 pin cylinder with 3 keys.	Security Cylinder: T60, T80, TX80, T10, T12. Masterkeying and keyed alike.
Latch	Entrada 60 ó 70 mm Saliente o recorrido 12,5 mm	127 mm rounded forend.
Accessories	Strike, screws, instructions and assembly template.	Rounded strike.
Packaging units	20

Functions

Function		Description	Function		Description
	00	ENTRANCE LOCK: both sides are locked and unlocked by outside key or inside turn-button.		11	ENTRANCE LOCK: as function 01 but with anti-thrust security latch, which prevents from thrusting the match with a card or similar.
	01	PASSAGE LOCK: locked and unlocked only by outside key. If locked, inside knob/lever is not active.		12	ENTRANCE LOCK: as function 02 but with anti-thrust security latch, which prevents from thrusting the match with a card or similar.
	01AP	CLASSROOM LOCK: locked and unlocked only by outside key. Inside always unlocked.		20	ENTRANCE LOCK: both sides are locked and unlocked by outside key or inside knob. Mortise lock. Applicable with electric strike.
	02	STOREROOM LOCK: outside fixed, entrance by key only. Inside always unlocked.		31	SINGLE DUMMY TRIM: screw attachment from inside of the door.
	03	BED AND BATHROOM LOCKS: both sides are locked and unlocked by the inside turn-button. Emergency release outside.		32	DOUBLE DUMMY TRIM
	04	PATIO LOCK: as function 03 but without outside emergency release.		33	ENTRANCE LOCK: both sides always unlocked. Applicable to mortise locks.
	05	PASSAGE LOCK: both sides always unlocked.		34	ENTRANCE LOCK: always unlocked. Applicable to mortise locks.
	07	OFFICE LOCK: key locks and unlocks each side separately. Door thickness: 40-50mm		35	ENTRANCE LOCK: outside fixed, inside always unlocked. Applicable to mortise locks.
	10	ENTRANCE LOCK: as function 00 but with anti-thrust security latch, which prevents from thrusting the match with a card or similar.		40	EXIT LOCK: locked and unlocked by outside key. Blank plate inside.
				45	COMMUNICATING LOCK: Always unlocked. Blank plate inside.

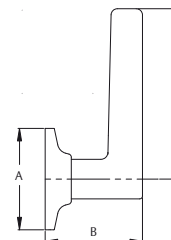

E

Cylindrical locksets

Resistant and smooth

- » The most durable, resistant and smoothest mechanism. Smoother, friction-free operation and lack of play due to rigid body construction. Two-and-a-half times stronger than any other lockset with tubular mechanism.
- » Heavy duty locksets. Applications: high-turnover commercial ones (hotels, universities, public buildings, offices...)

Features		Optional
Technical features	Panic release system in functions 03, 06 and 10.	
	Anti-lockout feature in functions 03 and 06.	
	Anti-thrust security latch.	
Anti-corrosion resistance according ASTM B117/90	CR, CM, NS.....	144 hours
	LP, LM.....	96 hours
Door thickness	33-51 mm lever furniture	
ANSI A156.2	Grade 2: 400.000 cycles	
UL	Up to 3 hours	
Cylinder	5 pin cylinder with 3 keys.	Security Cylinder: T60, T80, TX80, T10, T12.
		Masterkeying and keyed alike.
Latch	60 or 70 mm backset.	95 and 127 mm
	Latchbolt projection 12,5 mm.

Packaging units	20	

Cylindrical locksets

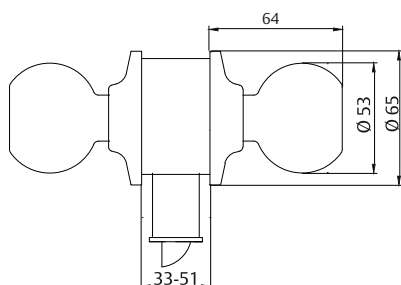

Functions

	Functions	Description
	03	BED AND BATHROOM LOCKS: both sides are locked and unlocked by the inside push-button. Emergency release outside.
	06	HOTEL LOCKS: fixed outside knob. Entrance by key only. Inside always unlocked. Inside push-button activates visual occupancy indicator, allowing only emergency key opening the lock.
	07	STORE LOCKS: both sides locked and unlocked simultaneously.
	08	COMMUNICATING LOCKS: both sides fixed. Both sides unlocked by key only.
	10	ENTRANCE LOCKS: push-button locks outside knob until unlocked by key or by turning inside knob. Key only unlocks, it does not lock.

For other functions go to the key-in-lever locksets

6900 Master series.

Access collection

E

Ways of access are changing. Evolving. They go through different stages... and then they're back. Which is why TESA is launching a new collection of Access knobs. A series boasting a state-of-the-art design concept bound to transform the world

of access with its range of models. Absolutely exclusive. Absolutely original. Different. Unique. A traditional way of access offering new and spectacular applications.

Standards: meets ANSI A 156.2:1996 and UNE-EN 12209:2003

In order to set categories of security, resistance and performance for knobs and bolts, the American National Standard Institute (ANSI) establishes three degrees of door locks. These degrees (1, 2 and 3, being 1 the highest degree) allow the user to choose the product that fits in best with his/her needs in terms of security and performance.

The European standard UNE-EN 12209 specifies the requirements and test methods to be carried out for durability, resistance, security and performance of mechanically operated locks and latches for doors.

In order to obtain certifications of any kind, all knobs must pass a strict test including the following requirements:

- » Knob's performance: maximum strength needed to remove the latch with the knob, with the key, and to close the door; minimum projection of the latch...
- » Knob's resistance: to twisting when the knob has been blocked; to horizontal and vertical pressure on the knob; resistance of the latch when the door is being knocked,...
- » The materials employed to make the knob, and their resistance to strain caused by impact,...

» Knob's finish: resistance to salt spray test; resistance to UVA ray, to tests of strength, scratch and perspiration (sweat) endurance.

» El material con el que está fabricado: resistencia del material a deformaciones por golpes, ...

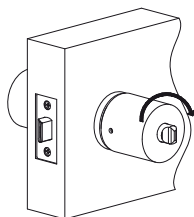

» El acabado: resistencia del acabado en ensayos de niebla salina; a los rayos UVA, a ensayos de dureza y rayado; a ensayos de sudoración.

Durability

Llegan a superar los 400.000 ciclos o accionamientos.
UNE-EN 12209: el máximo exigido por esta norma son 200.000.
ANSI A 156.2: grado 2.

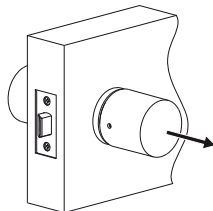

Rotation torque with blocked knob

Over 35 Nm.
UNE-EN 12209: the maximum chosen by this standard for knobs is 15 Nm.
ANSI A 156.2: 17 Nm are required to obtain degree 2.

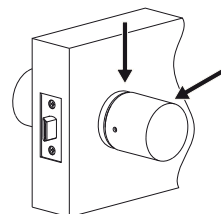

Axial load resistance

Over 150 kg.
UNE-EN 12209: the maximum required by this standard for all kinds of locks.
ANSI A 156.2: 138 kg are required to obtain degree 2.

Resistance to vertical and side load

Over 150 kg.
UNE-EN 12209: the maximum required by this standard for all kinds of locks.
ANSI A 156.2: 115 kg are required to obtain degree 2.

Dimensions in mm.

Technical data

Features	Optional	
Mechanism	Highly resistant with a very soft and easy opening.	
Application	High-turnover commercial applications	
	Medium-turnover residential applications.	
Technical features	Anti-thrust security pin for functions 10, 11 and 12.	
Anti-corrosion resistance according ASTM B117/90	CR, CM, NS..... 144 hours	
	LP, LM..... 96 hours	
Door thickness	33 - 45 mm	
	Except 07 function: 40-50 mm	
Escutcheon	Up to 60 mm with 50 mm rose.	
	Up to 75 mm with 65 mm escutcheon.	
ANSI A156.2	50 mm diameter.	
	65 mm diameter., except Block	
UL	Grade2: 400.000 cycles	
	Certifiable up to 1,5 hours.	
Cylinder	5 pin cylinder with 3 keys	
	Electronic cylinder.	
	Security Cylinder: T60, T80, TX80, T10, T12.	
Latch	Masterkeying and keyed alike.	
	127 mm	
Accessories	60 or 70 mm backset.	
	Latchbolt projection 12,5 mm.	
Packaging units	Rounded forend.	
	Strike, screws, instructions and assembly template.	
Packaging units	Rounded strike.

Functions

Function	Description	Function	Description
	00 ENTRANCE LOCK: both sides are locked and unlocked by outside key or inside turn-button.		11 ENTRANCE LOCK: as function 01 but with anti-thrust security latch, which prevents from thrusting the match with a card or similar.
	01 PASSAGE LOCK: locked and unlocked only by outside key. If locked, inside knob/lever is not active.		12 ENTRANCE LOCK: as function 02 but with anti-thrust security latch, which prevents from thrusting the match with a card or similar.
	02 STOREROOM LOCK: outside fixed, entrance by key only. Inside always unlocked.		31 SINGLE DUMMY TRIM: screw attachment from inside of the door.
	03 BED AND BATHROOM LOCKS: both sides are locked and unlocked by the inside turn-button (models with 65mm escutcheon) or push-button (models with 50mm rose). Emergency release outside.		32 DOUBLE DUMMY TRIM
	05 PASSAGE LOCK: both sides always unlocked.		33 DOUBLE DUMMY TRIM
	07 OFFICE LOCK: key locks and unlocks each side separately. Door thickness: 40-50mm		34 ENTRANCE: to be mounted with mortise locks
	10 ENTRANCE LOCK: as function 00 but with anti-thrust security latch, which prevents from thrusting the match with a card or similar.		

Finishes

LP - Polished brass

LM - Satin brass

CM - Satin chrome

CR - Polished chrome

NS - Satin nickel

Wooden and metallic doors

Wooden and metal doors are perfectly equipped with two simple machinings in the front and leaf of the door, and a quick assembly.
Even with previously mechanized doors, replacing an old lock with the new one will be enough to update the look of our doors.

Access control doors

Security with a new look. The Access Collection gives us the chance of getting the best from an access control system based on the electronic standalone cylinder (no wiring required).

Control is in your hands:

- Users identification.
- Access restriction according to time zones.
- Register of openings.
- Cancellation of lost and/or stolen keys..
- Flexibility.
- Compatible with mechanical masterkeying systems such as TX80.

Check Access control catalogue

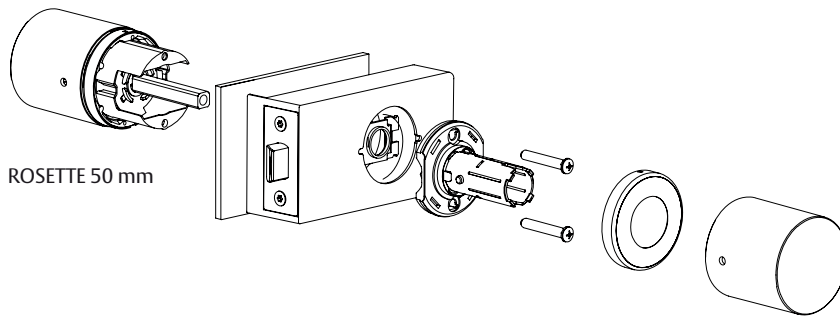

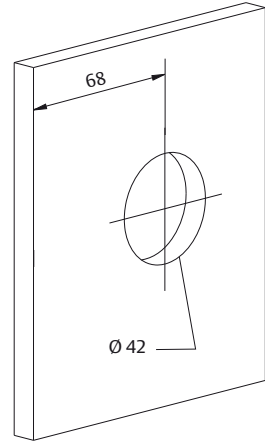

65 mm ESCUTCHEON for replacing other models
(except for BLOCK)

Glass doors

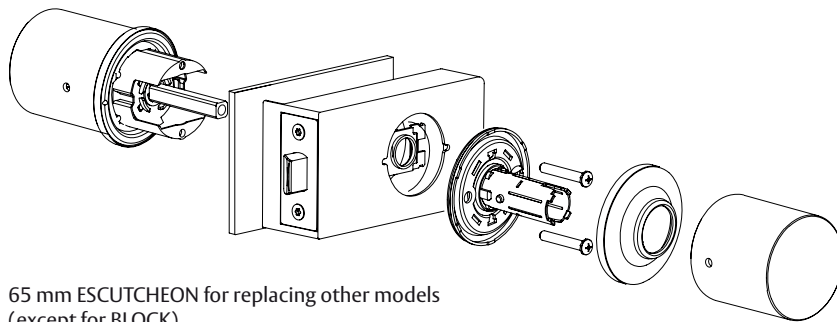

Metallic adaptor with incorporated latch, valid for 10 and 12 mm-thick glass doors. Adaptor also valid for deadlock with ADA thumb turn inside, allowing for an easier opening (ideal for disabled people).

Available strikes:

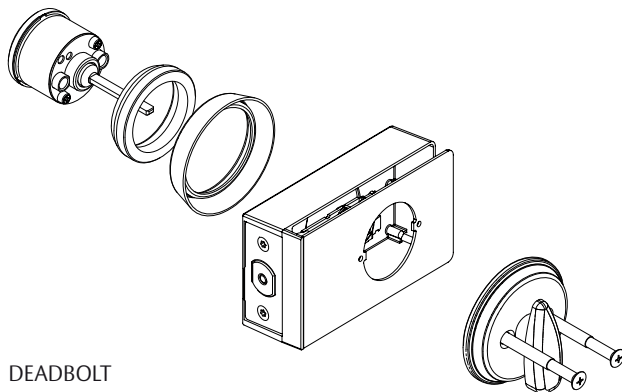

- » Standard for metal/wooden frame
- » Adaptor-strike for double leaf doors.

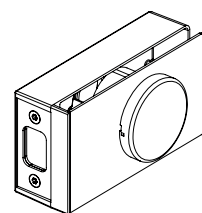

ROSETTE 50 mm
