Wire Connectors

Introducing T&B Marrette® Wire Connectors

In 1914, William Marr invented the world's first pressure-type wire connector. Since then, Marrette® connectors have become synonymous with "best quality wire connectors." Easy to install and comfortable in the hand, they are indispensable to electricians. And now they're available as key components of Thomas & Betts' Electricians' Supplies product line. This is very good news for your fingers.

How good are they?

The first thing you'll notice about T&B Marrette® wire connectors is that they come in a variety of types and styles, making it easy for you to identify wire size at a glance.

Feature for feature, here's what makes Marrette® connectors significantly better than other connectors.

- Marrette® connectors are the **ONLY** wire connector to offer a non-winged, variable-volume live-action spring in the connector. The spring expands to receive the conductors, rather than crushing them together as typical non-winged competitors do
- They can handle a broader range of wire connection combinations
- They're coated with 100% pure copper, which reduces the corrosion common to tin- and zinc-coated products
- Marrette® connectors' "finger-friendly" design offers a truer grip for less hand fatigue during repeated use
- They are the **ONLY** red non-winged connector that is UL Listed for a pair of #8 AWG wires
- The high-grade polypropylene outer shell prevents "blooming" or "blossoming" of the connector sidewall. The outer shell maintains a constant moisture level, reducing the likelihood of the connector becoming dry, brittle and subsequently cracked due to extreme heat or cold

Marrette® XTP® (Non-Winged)

Marrette® Green™ 1410

- Accommodates 14 to 10 AWG ground wires
- Fulfills the need to ground wires with a UL Listed connector
- Accepts multiple ground conductors
- Swept-back wing design affords installer good leverage to make ground connections
- Swept-back wing creates less box fill

T&B Set Screw Wire Connectors

Threaded brass inserts provide vibration-resistant connections that are easily removed for disconnection, visual inspection or rewiring. Thomas & Betts set screw wire connectors feature flexible, color-coded nylon insulating shells, which are compact for tight applications.

The nylon insulating shells resist heat, cold and impact with a temperature rating of 105°C (221°F) max. Rated: 600V

- Threaded brass inserts for vibration-resistant connections
- Easily removed
- Color-coded nylon insulating shells
- UL Listed and CSA Certified

Marrette® Set Screw Vibration-Proof/Visible Connection

The Marrette® Set Screw is a two-piece, pressure-type connector featuring a solid brass insert with a screw-on insulating cap. It's the perfect choice when changing a motor, adding a circuit, conducting instrument testing or simply lashing-up temporary wiring.

External Cap

- Made of rugged, phenolic material and 150°C-rated
- Insulator cap locks securely in place to safeguard against accidental loosening in high-vibration applications

Brass Insert

- Choice of slot or Robertson set screw. When tightening into the insert, provides a solid pressure-type connection on all approved wire combinations
- No need to "re-strip" wires when rewiring. Simply loosen set screw to remove non-twisted wires

- CSA (LR6591), UL (424H) — approved for circuits up to 600V and lighting fixtures and signs up to 1,000V
- Convenient packaging — sized right and jobsite ready!

Marrette® Black™ High-Temperature Wire Connectors

The Marrette® Black™ connector's high-temperature rating makes it the best solution for high-wattage lighting fixtures and signs.

External Cap

- Made of rugged, phenolic material and 150°C-rated
- Large, finely ribbed, "barrel-shaped" cap — makes it easier to grip even when hands are greasy or damp
- Deep, wide throat ensures full insulation coverage
- Threaded entry helps guide large wire bundles right into the spring

Inner Spring

- Internal round spring design multiplies the "twist-on" torque applied by the leverage and wedge action to firmly crush wires into a solid joint
- Unique copper-coated spring helps resist corrosion
- CSA (LR6591), UL (424H)
 - Model Nos. 29 & 30 Black™ are approved for circuit and fixture type connections up to 300V only
 - Model Nos. 31, 33, & 35 Black™ are approved for circuits up to 600V, and lighting fixtures and signs up to 1,000V

- Convenient packaging — sized right and jobsite ready!

Wire Installation and Wire Pulling Products

Wire Pulling Lubricant — Semi-Synthetic Base

T&B offers a choice of wire and cable pulling lubricants. The popular standard base, cold weather and advanced engineered polymer-base lubricants are available. Each features superior stability, adherence and cable compatibility as well as excellent lubricating properties.

- Preferred semi-synthetic base formulation
- Retains lubricating properties and will not separate up to 200°F
- Will not separate after freezing
- Superior adherence to cable
- Recommended for use on all commonly used wire and cable, including high-voltage cable and all UL Listed conduits
- Dries to slick, waxy film
- Non-toxic, no silicones, non-staining, easy cleanup

Technical Information

1. pH: 7.9
2. Coefficient of Friction (wet and dry residue)
sliding wet — 0.07
sliding dry — 0.08
3. Color: yellow
4. Weight per Gallon: 8.26 lbs.
5. Freezing Point: +25°F (-4°C)
6. High-Temperature Stability: 200°F (93°C)
7. Non-toxic, non-staining, contains no silicones

NOTE: Additional test data available upon request.

CAT. NO.	DESCRIPTION	STD. CTN.
15-231	1 Gallon	4

Suitable for use with wire or cable insulated with rubber (R, RH, etc.), Neoprene, nylon and PVC plastics (T, TW, THW, THHN, etc.), Hypalon*, high-density polyethylene and Cross Linked Polyethylene (XLP). Not recommended for use on asbestos or low-density polyethylene insulated cables. Compatible with semiconducting jackets present on high-voltage cable. Meets the requirements of ICEA Standards:

ICEA #S-61-402/NEMA Pub. #WC5

ICEA #S-66-524/NEMA Pub. #WC7

UL File E-43782.

*Hypalon is a registered trademark of E.I. DuPont.

For 24-hour safety and MSDS requirements, call Chemtrec at 800-424-9300.

WireSlick™ Wire and Cable Pulling Lubricant*

WireSlick™ wire and cable pulling lubricant represents the latest in polymer technology. An economical formulation, WireSlick™ polymer-base lubricant provides extremely good thermal stability and a lower freezing point (20°F) than clay-, soap- or wax-base formulations.

WireSlick™ is recommended for use with wire or cable insulated with rubber (R, RH, etc.), Neoprene; nylon and PVC plastics (T, TW, THW, THHN, etc.); Hypalon*; High-Density Polyethylene and Cross-Linked Polyethylene (XLP). It is also compatible with high-voltage cable with semi-conducting jackets.

WireSlick™ has been tested and passes the requirements of ICEA Standards:

ICEA #S-61-402/NEMA Pub. #WC5

ICEA #S-66-524/NEMA Pub. #WC7

- Polymer-base formulation
- Universally compatible with all types of wire and cable
- Widely used by power and telephone utilities
- Economical lubricant

Technical Information

1. pH: 8.2
2. Coefficient of Friction (wet and dry residue)
sliding wet — 0.11
sliding dry — 0.17
3. Color: orange
4. Weight per Gallon: 10 lbs.
5. Freezing Point: +20°F (-7°C)
6. High-Temperature Stability: 200°F (93°C)
7. Non-toxic, non-staining, contains no silicones

NOTE: Additional test data available upon request.

*Hypalon is a registered trademark of E.I. DuPont.

Wire Installation and Wire Pulling Products

Conduit Benders

T&B Conduit Benders include manual benders and hickies for easy and accurate bending of ½" to 1½" EMT and ¼" to 1" rigid and IMC conduit.

From the unparalleled durability of our Ductile-Iron Benders to economical Aluminum-Alloy Benders, T&B offers you a choice. High-strength, case-hardened handles are also available for a bending system designed to last a lifetime.

- Durable construction
- Embossed benchmark symbols and degree scales "raised indices"
- Flat-backed hook
- Offset bending guide included on each handle
- 40% stronger than malleable iron
- Traditional design with increased strength
- Guaranteed against breakage for life
- Extended foot pedal

Ductile-Iron Conduit Benders

		SIZE	LENGTH (IN.)		
50-210	#8 x ¾"	6, 7 or 8	1-1¼	⅝	1,000
50-230	#12 x 1"	9, 10 or 12	1-1¼	¾	1,000
50-250	#16 x 1½"	14 or 16, ¼" Lag Screw	1¼-1½	⅝	500

Bulk

50-219	#8 x ¾"	6, 7 or 8	1-1¼	⅝	10,000
50-239	#12 x 1"	9, 10 or 12	1-1¼	¾	10,000
50-259	#16 x 1½"	14 or 16, ¼" Lag Screw	1¼-1½	⅝	10,000

* When impact hammer drill is used, downsize drill hole ⅛".

NOTE: For maximum holding power, select screw length ¼" longer than anchor.

Red-Cap® Anchor Kits

- Red Cap® anchors, screws and drill bit in reusable plastic kit box

CAT. NO.	DESCRIPTION	STD. CTN.
51-208	(100) #8 Anchors (100) 6 x 1" Panhead Screws (1) ⅝" Carbide-Tip Drill Bit	12
51-212*	(100) #12 Anchors (100) 10 x 1" Combination Slot/Phillips Head Screws (1) ¾" Carbide-Tip Drill Bit	12
51-212HX	(100) #12 Anchors (100) 10 x 1" Hex-Slotted Screws (1) ¾" Carbide-Tip Drill Bit	12
51-216	(50) #16 Anchors (50) 14 x 1¼" Panhead Screws (1) ⅝" Carbide-Tip Drill Bit	12

* Now with combination Slot/Phillips screws.

Economy Plastic Screw Anchor

- Superior holding power in solid masonry or concrete block

CAT. NO.	SIZE	FOR TAPPING SCREWS		DRILL* HOLE (IN.)	STD. CTN.
		SIZE	LENGTH (IN.)		
50-404	#12 x 1"	10 to 12	1	¾	1,000

* When impact hammer drill is used, downsize drill hole ⅛".

Economy Screw Anchor Kits

CAT. NO.	DESCRIPTION	STD. CTN.
51-404*	(100) #12 x 1" Screw Anchor (100) 10 x 1" Slot/Phillips Head Screws (1) ¾" Carbide-Tip Drill Bit	12
51-404HX	(100) #12 x 1" Screw Anchor (100) 10 x 1" Hex-Slotted Screws (1) ¾" Carbide-Tip Drill Bit	12

* Now with Slot/Phillips screws.

Hi-Drive™ Nail Anchors

- For use in concrete, masonry, blocks, stone or plaster
- Dependable, low-cost, lightweight anchoring

CAT. NO.	SIZE (IN.)	DRILL* HOLE (IN.)	STD. CTN.
50-811	⅝" x 1	⅝	1,000
50-831	¾" x 1	¾	1,000

* When impact hammer drill is used, downsize drill hole ⅛".

Hi-Drive™ Nail Anchor Kit

CAT. NO.	DESCRIPTION	STD. CTN.
51-850	(100) ⅝" x 1" Anchors w/ Nails (1) ⅝" Carbide-Tip Drill Bit	12
51-852	(100) ¾" x 1" Anchors w/ Nails (1) ¾" Carbide-Tip Drill Bit	12

Anchors, nails and drill bit in reusable plastic kit box.

Hardware and Rough-In Products

Machine Bolts

Hardware and Rough-In Products

Silicone Lubricant for High-Voltage Electrical Work

- Seals around junction boxes, flashings, service mast entries, service cable entries and countless other applications
- Easy to use, forms around irregular surfaces and configurations
- Highly resistant to cracking, drying and shrinking
- Cuts and trims easily

CAT. NO.	SIZE	STD. CTN.
SL-5	5 oz.	12

Duct Seal

- Can be painted immediately after application
- Gray color
- No unpleasant odor
- +20°F to 212°F workable temperature range
- -40°F to 250°F service temperature range
- Contains no asbestos

CAT. NO.	DESCRIPTION	STD. CTN.
DX-1	1 Lb. Slug	50
DX-5	(5) 1 Lb. Slugs	10
DX-5S	5 Lb. Slug	10

UL Classified R13335.

NOTE: Not classified as a "Fire Stop." For moisture and air sealing only.

Wire Bristle Brush

- For removing oxides from conductor surfaces
- Easy-grip handle with glove guard to prevent rubber glove puncture
- Long-life brushes can be rotated and are replaceable
- Handle and guard coated with durable non-conductive plastic

CAT. NO.	TYPE	STD. CTN.
WWB1	Complete Brush with Handle	6
WRB1	Wire Element Only, Pair	30

CONTAX® Oxide-Inhibiting Compound

- Seals electrical connections from oxygen and moisture
- Non-water soluble, non-petroleum based polymer grease
- Non-toxic, will not irritate the skin
- Service temperature to 460°F; can be applied in 0°F weather

Wire Testing Equipment

19-660C Audible Voltage Continuity Tester

T&B model 19-660C is designed for the everyday needs of the professional electrician and is made in the USA.

This Solenoid-type tester model's features include:

- Three voltage indications: Solenoid vibration sensing, electronic neon visual indication and audible buzzer
- Positive AC/DC voltage identification: 6 to 600 Volts 60/50 Hz
- Automatic testing for continuity through 300K ohms
- Electronic buzzer indication for AC/DC voltage and continuity
- Positive or negative DC pole identified by neon lamp
- Replaceable leads
- Retractable and locking, spring-loaded shrouds protecting metal probes
- Durable metal probes capable of piercing insulation-covered conductors
- Self-extinguishing, high-impact sealed case and prod assemblies prevent dirt, dust and small objects from entering the tester
- Includes A76 batteries
- Case serves as prod holder for one-handed operation

Model 19-660C

CAT. NO.	DESCRIPTION	STD. CTN.
19-660C	Audible Voltage/Continuity Tester—Solenoid Type	10

Receptacle Tester

- Conveniently tests receptacles for proper wiring, including polarity and presence of safety ground wire
- Easy-to-read indication legend
- Pocket size
- UL Listed, CSA Certified
- Label gives interpretations of all readings

CAT. NO.	DESCRIPTION	STD. CTN.
19-060	Receptacle Tester for 120V Circuits	6

UL File E-80682.

High-Volt Testers

- 90–250 Volts AC/DC
- Convenient pocket clip on 19-079

19-079

CAT. NO.	DESCRIPTION	STD. CTN.
19-079	Tester & Screwdriver, 5" Overall Length	6

Wire Caddy™

- Dispense small quantities of spooled wire

- Each unit shipped in two cartons
- Two pieces per pallet

Carlton®

Wire Safe® Wireway and Wiring Trough

Carlton® Wire Management Products

No wires to pull, no hard-to-work-with metal components.

Carlton® leads the way with the world's broadest line of non-metallic wiring management products designed for easier installation, greater performance and lower installed cost. That includes our Carlton® Wire Safe® wireway, wiring trough and fittings. It's the perfect solution for containing electrical, electronic and communication wire and cable. That's because it's easy to install, provides durable protection and eliminates the need to pull conductors, too. Just compare it point-for-point against the competition and you'll see why it's the best alternative for you.

Rugged Yet Lightweight.

UV stabilized, high-impact resistant PVC provides a strong, durable, non-corrosive, non-conductive housing for wire and cable. At the same time, components are so light and easy to handle that installation can be done by one person.

Easy to Cut and Assemble.

Wireway and trough can be cut easily and cleanly with either a hacksaw or fine tooth saw to make field fabrication a snap. And it's equally easy to couple components with either Carlton® primer and PVC cement or non-metallic push rivets.

Carlton®

Wire Safe® Wireway and Wiring Trough

No Wires to Pull.

Once your wireway or trough is installed, just lay your wire and cable in, pop the cover on and you're done. It's as easy as that, and that's a lot easier than pulling wire or cable.

Easy to Rewire.

"Clip-on" cover design enables easy access for adding or removing wire and cable after initial installation.

Application Flexibility.

Wireway and trough are suitable for a wide range of applications, from the most demanding commercial and industrial uses, including food service companies and chemical plants, to communication and computer facilities. Both wireway and trough can be used on walls, ceilings or across supports.

A Complete Non-Metallic System.

Both wireway and trough are available in 2" x 2", 3" x 3", 4" x 4" and 6" x 6" dimensions. Wireway comes cut in easy-to-use 10' lengths for larger jobs, and for tighter spaces, we offer specific lengths of wiring trough to fit distances of 1' to 10'. Both can be used with our non-metallic enclosures, conduit and fittings to create a total non-metallic wire and cable management system far superior to metal counterparts.

Improved NEMA 12 Wireway End Caps.

Our new wireway end caps are now made with pre-installed adhesive-backed gaskets. This new design makes them easier to use and also qualifies them for a NEMA 12 rating.

Installation Instructions

Description.

Carlton® Wire Safe® Wireway and Wiring Troughs are manufactured from extruded PVC. The standard color is gray. The wireway consists of a base channel that is formed to receive a "clip-on" cover. Wiring troughs include a pair of ready-to-install end caps.

Cover Installation and Removal.

The cover can be installed by exerting hand pressure along its front face in such a manner as to engage and clip projections on the side walls of the base channel. The cover can be removed by inserting a tool (i.e., a screwdriver shaft) into one end of the wireway enclosure and exerting pressure against the underside of the cover, which is then "peeled off" from the base.

Wireway Fittings.

Fittings enable the wireway to be positioned around corners and enable tees and crosses to be created without detracting from the protective characteristics. Interconnecting pieces can be assembled using couplings and rivets or cement as necessary.

Molded fittings do not require couplings because they fit on the exterior of the wireway. However, primer and solvent cement are needed. **See cementing instructions on page G-24.**

Fabricated fittings do require internal or external couplings, and these must be ordered separately. To install fittings, a $\frac{1}{8}$ " diameter hole should be drilled in the wireway to match the external coupling hole. A push rivet should be used to connect the two pieces. To connect an internal coupling to the inside of a fitting, use Carlton® Quick-Set Clear Cement.

Applications.

These systems are designed for use in commercial and industrial areas. They may be used for the containment of electrical wiring/cables for power and lighting circuits and also communication and computer facilities. They are suitable for mounting on the surface of walls or ceilings or suspended across suitably positioned supports. Ambient temperatures should not exceed 122° F.

Installation.

1. Mark the surface upon which the wireway is to be mounted.
2. Measure, run and identify position of fittings.
3. Remove cover from wireway, starting at one end, with a peeling action (use of a screwdriver or similar lever is recommended).
4. Drill mounting holes through base at 36" centers maximum. Two rows of mounting holes should be drilled, adjacent to each wall of the wireway, in order to evenly distribute the load.
5. The holes in the wireway should be drilled oversize to enable expansion. Washers should be mounted under the head of the mounting device, which should not be tightened to its full extent.
6. Mount the wireway using screws or bolts.
7. Affix the wireway cover by aligning it to the wireway base and then pressing it into its engaged position, starting at one end.
8. The cover should be made to overlap the base joint in order to improve rigidity of the joint.

Engineering Specifications

Code Approvals.

Carlton's® Wire Safe® Wireway and Wiring Trough are recognized by the current National Electrical Code®, Article 378, for non-metallic wireways. It is UL Listed for electrical wiring up to 600 volts. UL File Numbers: UL E151021.

Specification for Carlton® Wire Safe Wireway and Wiring Trough.

- The wireway and wiring troughs shall be Carlton® Wire Safe Wireway and Wiring Trough.
- The Carlton® Wire Safe Wireway and Wiring Trough shall provide protection for electrical, low voltage, data and communication wiring or cables.
- The Carlton® Wire Safe Wireway and Wiring Trough shall be listed and installed per the NEC® Article 378 for non-metallic wireways.
- The Carlton® Wire Safe Wireway and Wiring Trough shall be manufactured from gray precision extruded Polyvinyl Chloride (PVC) meeting UL 94 V-0 requirements and shall be suitable for field painting.
- The Carlton® Wire Safe Wireway and Wiring Trough shall include base, cover, fittings, etc.
- The Carlton® Wire Safe Wireway and Wiring Trough shall provide all fittings required to form a complete, integrated surface raceway system. End caps shall be gasketed and shall have a NEMA Type 12 rating.
- The Carlton® Wire Safe Wireway and Wiring Trough shall provide raceway with the following cross sectional areas:

1. 2 x 2 — 3.165 in. ² (20.4 cm ²)	3. 4 x 4 — 13.694 in. ² (88 cm ²)
2. 3 x 3 — 7.378 in. ² (47 cm ²)	4. 6 x 6 — 31.871 in. ² (205 cm ²)

Fittings.

Internal and external elbow shall be a fitting cover that snaps onto the main base. Flat elbows and flat tees shall be a fitting cover that snaps on to the main base. End caps shall be gasketed and NEMA Type 12 rated.

Installation.

Install in accordance with the manufacturer's instructions, NFPA 70 and NECA standard. Install base, cover, fittings, accessories, etc., as necessary for a complete system.

Carlton®

Wire Safe® Wireway and Wiring Trough

Cementing Instructions

1. Make a square cut using a miter box or precisely marked line on the wireway to provide a smooth connection.
2. Make certain surfaces to be bonded are free of dirt, dust, etc., by wiping them clean with a rag and by removing sawcut burrs with a knife or rasp.
3. With a dauber, place a coating of Carlton® Clear Primer on the wireway and its mating parts. Thoroughly coat the surfaces to be mated.
4. Allow the Carlton® Clear Primer a few seconds to soften the PVC surface (the time may need to be adjusted depending upon the temperature).
5. Apply a complete coating of Carlton® Quick-Set Clear Cement to matching ends that will be joined.
6. Hold the parts in position by exerting pressure on the surfaces with clamps.
7. Allow 15 minutes or more before removing clamps.

Expansion And Contraction

Wireway will expand or contract with variations in temperature. To compensate for this expansion and contraction, during installation leave a 0.25" gap at joint, glue only one side of internal coupling or use external coupling with push rivets. All mounting holes should be drilled oversize and fasteners should not be tightened fully to allow for expansion and contraction.

* Dimensions of RHH and RHW.

*** Dimensions of RHH and RHW without outer covering are the same as THW No. 18 through No. 10, solid as well as No. 8 and larger, stranded.

† Dimensions of THW in sizes No. 14 through No. 8. No. 6 THW and larger are same dimension as TW.

‡ No. 14 through No. 2.

NOTES:

1) The ampacities of the conductors shall be reduced as shown in the table below.

2) Refer to the National Electrical Code® for ambient temperature correction factors.

COLUMN A — PERCENT OF VALUES IN TABLES AS ADJUSTED FOR AMBIENT TEMPERATURE IF NECESSARY		COLUMN B** — PERCENT OF VALUES IN TABLES AS ADJUSTED FOR AMBIENT TEMPERATURE IF NECESSARY	
NUMBER OF CONDUCTORS		NUMBER OF CONDUCTORS	
4 through 6	80	4 through 6	80
7 through 9	70	7 through 9	70
10 through 24*	70	10 through 20	50
25 through 42*	60	21 through 30	45
43 and above*	50	31 through 40	40
—	—	41 through 60	35

* These factors include the effects of a load diversity of 50 percent. ** No diversity.

EZCODE®

EZL500 Thermal Label Printer

NEW!

The industry's most sophisticated label printer is also the easiest to use. It's so smart, it's simple!

EZL500 Thermal Label Printer

- Large LCD screen makes viewing easy
- Powerful firmware is easy to use and update
- Ergonomic design makes it easy to carry
- Thermal transfer technology enables you to print non-smearing labels
- Cut a label with just the touch of a button
- Large tape cassette maximizes the amount of tape media
- Wide output port makes it easy to collect your printed labels
- Backlit display enables use in low-light environments
- Oversized keys and spacing make it easy to type labels
- Integral cassette sensor automatically adjusts the unit to your tape's width and media type, eliminating reprogramming with each tape switch
- Can be outfitted with a long-life, rechargeable, 7.4V Li-ion battery

With the EZCODE® EZL500 thermal label printer, you can print the widest variety of labels used on the most surface types — and, you can use it in more work environments than any other thermal label printer on the market. Best of all, it's easier to use than any other thermal label printer. With the EZL500 printer, you'll be labeling cable jackets and other surfaces in no time at all!

It's easy to get a handle on things

The printer's simple-to-use but powerful firmware makes operation intuitive, so you won't spend valuable time reading the instruction manual. The ergonomically designed EZL500 printer fits comfortably in your hand. Rubber molding enables a firm grip, and helps to protect the unit in case of an accidental drop. The EZL500 printer features the largest backlit LCD screen of all handheld thermal label printers. It enables you to easily see information on display, and is especially useful in low-light conditions.

EZCODE®

EZL500 Thermal Label Printer

Just print, cut and stick

Using thermal transfer technology, the EZL500 unit prints labels that won't smear. Based on average usage, the print head can be expected to last up to 10 years. Now that's reliability! The automatic cutter function enables you to cut a label with the touch of a button. And, unlike some competing models, the cutting blade can be easily changed.

Size matters

You'll appreciate the EZL500 printer's oversized, wide-spaced keys, so you won't hit multiple buttons by mistake. Use hard-coded function keys for immediate access to frequently used functions. Soft-menu keys are ideal for infrequent functions. Able to handle a variety of tapes ranging in size from 1/4"–1" wide, the EZL500 printer enables you to use more media than any other thermal label printer. The integral cassette sensor automatically adjusts the unit to your tape's width and media type — so you don't have to reprogram the printer with each cassette change!

Do more, do more longer

The EZL500 printer runs on six standard AA batteries or an optional, rechargeable 7.4V Li-ion battery. The Li-ion battery has a longer life than standard batteries, and lasts longer than most other rechargeable batteries.

In short, the EZL500 printer is ready to work on the lengthy jobs you have now, and the ones you'll be doing years down the road.

When you're working in tight spaces, the handy magnet strap lets you stick the EZL500 printer to a vertical metallic surface, freeing your hands until you need to use it again.

With the included PC connection software and built-in mini USB port, you can print directly from your computer and easily upgrade the software.

PCS-EZL500	PC Software and USB Cable for EZL500
CC-EZL500	Hard Carrying Case for EZL500
RB-EZL500	EZL500 Rechargeable Battery

EZL500 Thermal Label Printer Tapes

- **Nylon** — Excellent for wire and cable wrapping on curved, textured and highly textured surfaces, these flexible labels feature EZ-Peel split backs and industrial-strength adhesive
- **Polyester** — Perfect for general labeling on flat or textured surfaces, these labels also come with EZ-Peel split backs and industrial-strength adhesive
- **Heat-Shrink** — Made of flame-retardant polyolefin with 3:1 shrink ratio for extra protection and wire and cable insulation, these labels meet MIL-DTL-23053/5 Class 1 and 3 Standards
- **Vinyl** — Able to resist oil, dirt, grime and solvents on smooth, textured or curved surfaces, this flexible label features an EZ-Peel split back and industrial-strength adhesive; it's excellent for indoor/outdoor use
