Curtron Products

Curtron Products
EISA 2007 COMPLIANT

Curtron Products offers a number of economical door systems that help cut refrigeration and energy costs on walk-in cooler and freezer applications. These solutions help meet compliance with the Energy and Independence Security Act of 2007 that requires all newly manufactured walk-in coolers and freezers to include a strip door or swinging door.

CURTRONIZER™ NSF STRIP DOORS

For openings up to 40" Wide x 96" High

STANDARD FEATURES
• NSF Approved strip door system
• Low profile polypropylene hardware
• Available with 4", 6", or 8" wide strips
• Standard Clear or USDA Polar Reinforced PVC strips
• 4 packs of replacement strips are available

M-SERIES PREMIUM STRIP DOORS

For openings up to 108" Wide x 108" High

STANDARD FEATURES
• Loop strips alleviate stress at the point of contact with traffic
• Universal Mount hardware for in-jamb or face of wall mount.
• Available with 4", 6" or 8" wide strips
• Standard Clear or USDA Polar Reinforced PVC strips
• 3 and 6 packs of replacement strips are available

POLAR-PRO™ FLEXIBLE SWING DOORS

For openings up to 60" Wide x 96" High

STANDARD FEATURES
• Spring hinge design allows the door to swing open and closed on an even plane
• Stainless Steel Universal Mounting hardware for in-jamb or face of wall mount has a lifetime warranty against corrosion
• Anti-Curl strip included
• Standard Clear or USDA Polar Grade door panels

FOOD SERVICE TRAFFIC SOLUTIONS

Curtron Products

Curtron Products offers energy efficient solutions for managing high-traffic areas. Service-Pro™ Traffic Doors are ideal for restaurants and food environments that require separation between kitchens and customers. Mega-Pro™ Swinging Doors and Industrial Strip Doors are used in food processing and cold storage warehouses to control traffic, dust, odors, smoke, and temperatures.

SERVICE-PRO™ TRAFFIC DOORS   See Pages 11-12 for Complete List

Single panel doors up to 48" wide x 96" high openings
Double panel doors up to 96" wide x 96" high openings

STANDARD FEATURES
- Variety of door constructions available: sheet, wood core, polystyrene insulated, high density polyethylene
- Variety of finishes: aluminum, stainless steel, laminates, or solid colors
- Optional steel door frames
- One year warranty
- Quick lead times

BENEFITS:

- Separates environments

- Reduces noise between employee and customer areas

- Control traffic flow

- Control air flow to help manage temperatures

MEGA-PRO™ SWINGING DOORS   Page 13 for Complete List

For openings up to 10' wide x 10' high

STANDARD FEATURES
- Light industrial impact doors that swing open and closed on an even plane
- Flexible clear .160" thick door panels with optional welded-on black PVC impact plates
- Galvanized steel swing leaf arms
- Optional USDA Low Temperature panels

BENEFITS:

- Immediate energy savings

- Reduces hot and cold air loss

- Increases employee comfort

- Admits light for safe work environments

- Restricts movement of air pollutants

STRIP DOORS   See Pages 14-15 for Complete List

STANDARD FEATURES
- Standard clear PVC strips in widths from 4" to 16" and in thicknesses from .060" to .240"
- Heavy duty strip door hardware for in-jamb or face of wall mounting
- Largest selection of flexible strip types in the food service industry
- Large inventory and quick lead times
- Save-T Loc™ hardware installs 75% faster than other doors in the industry

- Isolate noisy warehouse or sensitive processing environments

- Provides bird and flying insect control

Curtron Products offers a wide variety of food protection products, including a complete line of Protecto™ Rack Covers, Caser™ display cooler curtains, and pull down night shade thermal curtains. These are economical solutions that protect food from potential spoilage, and are effective means of protecting food from insects and other airborne pollutants.

BENEFITS:

• Quick payback period - may be eligible for energy rebates

• Extends product shelf life, especially in the event of a power failure

• Cuts compressor running time and reduces energy costs

• Light weight, convenient designs

CASER™ DISPLAY CURTAINS

See Page 17 for Complete List

STANDARD FEATURES
• Clear, flexible PVC curtains for open-faced coolers contain cold air inside the display case
• Smooth edges allow for safe reach-through
• Attach directly to the cooler canopy with hook and loop Velcro®
• No tools required for installation
• Custom sizes are available for any display case

PULL DOWN NIGHT SHADES

See Page 17 for Complete List

STANDARD FEATURES
• Retractable pull down night shades
• Available in translucent white or clear material
• Can be mounted vertically or horizontally
• Mount directly to the case via self-tapping screws
• Self-storing when not in use
• Standard size is 48" wide and pulls down to 72" long

BENEFITS:

• Enhances food safety

• Keeps food fresh and clean

• Protects against airborne bacteria

• Aids in proofing and retarding

• Reduces drying and crusting of dough

• Eliminated the need to cover individual plates or trays

• Keeps flying insects out

PROTECTO™ RACK COVERS

See Page 16 for Complete List

STANDARD FEATURES
• Standard Rack Cover Size: 23" Wide x 28" Deep x 62" High
• Material types include clear, translucent white, reinforced vinyl, breathable mesh, or insulated
• Triple reinforced corners
• Universal load – full access zippers (Velcro® optional)
• Tear resistant

INSECT CONTROL SOLUTIONS

Curtron Products

Curtron Products has lines of insect control air doors and silent fly traps that quietly and efficiently control insects even in the most high traffic food service areas. Air Doors create an invisible barrier of air that prevents insects from flying in when doors are open. Pest-Pro™ Silent Fly Traps capture flying insects without the noise and mess of traditional bug zappers.

ECFD & EIBD AIR DOORS

See Pages 20-22 for Complete List

Commercial (ECFD) and Insect Control (EIBD) Air Doors for openings up to 72" wide x 96" high

FEATURES
- Aluminized steel, one-piece construction
- Unmatced air flow uniformity
- Filters for improved air quality included
- Exceptionally low noise levels (53/51 dBA)
- Five-year parts warranty for unheated units (18 months for heated units)

BENEFITS:

- Reduce energy costs

- Stops flying insects, outside drafts, and airborne pollutants

- Increase employee and customer comfort

COMMON APPLICATIONS:
- Restaurants
- Distribution Facilities
- Personnel Openings
- Supermarkets
- Convenience Stores
- Restaurants
- Bakeries

PEST-PRO™ SILENT FLY TRAPS

See Page 23 for Complete List

Covers areas up to 3,000 square feet

STANDARD FEATURES
- Silently captures flying insects without the mess and noise of traditional bug zappers
- High intensity UV lights attract insects and trap them against adhesive panels
- Series 100 are available in decorative white or bronze finishes
- Powder-coated finish
- 120 volt, single phase power with a three prong plug
- Replacement UV lights and adhesive panels are available and can be installed in minutes
- Most units in stock for same day quick-ship

Pest-Pro™ Series 100

Pest-Pro™ Series 200

BENEFITS:

- Economical and sanitary way to control flying insects

- Helps your business comply with UDSA and FDA guidelines

- Increase employee and customer comfort

- Easy to maintain

COMMON APPLICATIONS:
- Restaurants
- Kitchens
- Hallways
- Hotels
- Supermarkets
- Retail Stores
- Casinos and Resorts

- For light duty traffic on walk-in coolers, freezers, and personnel doors

- For openings up 108" high

- Common door sizes are in stock for same day shipment

COMMON APPLICATIONS:
- Walk-In Coolers
- Walk-In Freezers
- Personnel Openings
- Supermarkets
- Restaurants
- Bakeries

BENEFITS:
- Immediate energy savings - dramatically reduce heating and cooling bills

- Pays for itself in energy savings alone in as little as three months

- USDA Approved and FDA Compliant

- Complies with Energy Independence and Security Act of 2007

- Reduces moisture and frost build-up in coolers and freezers

- Increases employee comfort
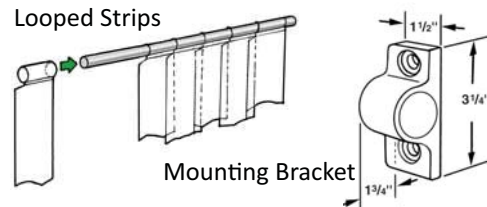

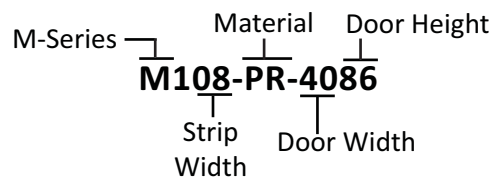

EISA 2007 COMPLIANT

Curtron's M-Series Strip Doors are an economical solution to separating work environments, cutting heating and energy costs, and creating a more comfortable work environment. M-Series looped-style strip doors take minutes to install, and have a payback period of as little as three months.

STANDARD FEATURES
- Aluminum mounting bars alleviate stress at the point of contact with traffic
- Universal mounting brackets allow for either in-jamb or face of wall mounting
- USDA Polar Reinforced strips remain flexible to -20° F
- Standard grade clear strips remain flexible to 0° F

- 9" x 14" clear acrylic window

FINISH OPTIONS
- Choice of polyethylene (HDPE) finish: white, black, beige, gray

HINGES
- Top mounted Save-T™ Hinge features hardened rollers and offset cam system
- Bottom hinges mount to the floor to ensure firm support
- Hinge edge is reinforced with an aluminum extrusion, adding strength and stability.

Series 70 - Single Panel
HDPE Door with
Optional 14" x 14" Window

Curtron Products also offers Structural Steel and C-Channel door jambs that are custom made to any wall thickness. Contact your Sales Professional for more details.

MEGA-PRO™ SWINGING DOORS

Curtron's Mega-Pro™ Swinging Doors are clear, flexible, light industrial impact doors for openings up to 10' wide and 10' high. Mega-Pro™ doors swing open and closed on an even plane.

STANDARD FEATURES
- Standard grade clear PVC panels remain flexible to 0° F
- Spring hinge design allows the door to swing open and closed consistently on an even plane
- Heavy duty galvanized steel swinging arms
- Adjustable torsion spring allows the door to close at different speeds while creating a seal around the opening
- All Mega-Pro™ doors ship flat on a custom made wooden skid

MEGA-PRO™ OPTIONS:
- Welded-on impact plates on front and back
- Optional Standard grade clear panels in .240" and .275" thicknesses
- Upgrade to USDA Low Temperature PVC panels
- Optional breakaway hinges give additional support and prevent swaying

Mega-Pro™ Model Numbers

Mega-Pro | Door Thickness | Door Height

MP-C-160-9696-IP

Clear | Door Width | Impact Plates
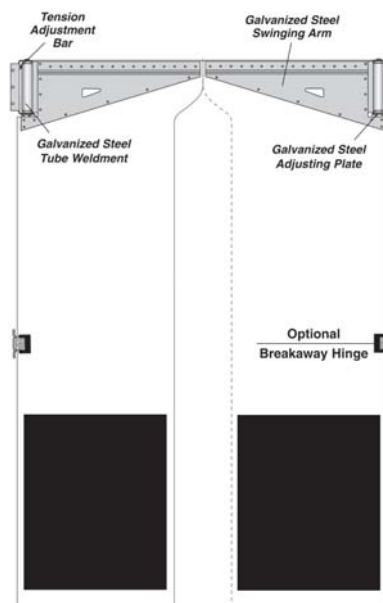

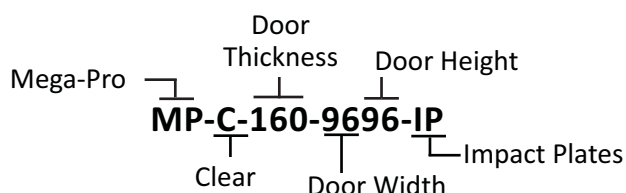

- For light and medium impact forklift, pallet jack, and personnel traffic
- For openings up to 120" wide x 120" high
- Interior applications only
- Mounting hardware is located at the top of the door only, away from normal traffic patterns

COMMON APPLICATIONS
- Warehouses
- Manufacturing
- Coolers
- Food Processing Facilities
- Poultry Plants

BENEFITS
- Immediate energy savings
- Reduces hot and cold air loss and restricts movement of airborne pollutants
- Separates environment
- Isolates noisy warehouse and manufacturing areas
- Creates a safer working environment

*For Impact Plates, please add "IP" to the end of your model number.
*These are only the most common sized doors. We manufacture doors for any opening up to 10' wide x 10' high.

Curtron Products

Strips are available in widths from 4" to 16" and in thicknesses from .060" to .500"

Benefits:
• Immediate energy savings- strip doors can pay for themselves in less than six months in energy savings alone

• Best clarity in the Industry

• Reduces hot or cold air loss

• Restricts movement of air pollutants

• Admits light for safer environment

• Provides bird and flying insect control

• Isolates noisy machinery

• Increases employee comfort

• Easy to install

COMMON APPLICATIONS:
• Walk-in Coolers and Freezers
• Loading Dock Doors
• Refrigerated Trailers
• Craneways
• Room Dividers
• Personnel Doors
• Exterior Openings
• Warehouse Dividers

Curtron's complete line of Strip Doors and Strip Curtains are the most economical solutions to protect employees and goods from adverse environmental conditions such as noise, heat, cold, humidity, dust, and drafts. Curtron has over 4 million pounds of PVC in stock, the widest variety of material in the industry.

All strip doors include galvanized steel Save-T Loc™ Universal Mount hardware. Strips are either Standard grade Clear or Offset Double Ribbed clear, and include safety orange end strips.

• Standard Clear - for traffic in temperatures from 0° to 140° F
• Offset Double Ribbed Clear - for forklift traffic in temperatures from 0° to 140° F
• Other grades include USDA Low Temperature Polar, USDA Low Temperature Polar Reinforced, USDA Low Temperature Polar Offset Double Ribbed, and Extra Low Temperature

SAVE-T LOC™ HARDWARE

• This patented hardware reduces installation time by as much as 75%

• Save-T Loc™ tabs are used to ensure that strips do not come loose in two way traffic

• Fits all flat and ribbed PVC strip material

• Traditional nut and bolt style hardware also available

• **Standard Clear Temp Range: 0° to 140° F**

• **Polar Temp Range: -20° to 140° F**

BENEFITS

• 35% cost savings over traditional strip doors & replacement strips

• No tools required for strip replacement

• Clean cut - no fraying

• Easily dispensable

• Small compact box = less storage space

• Ideal for service trucks

• Common sizes in stock

• Fits 99% of existing studded hardware

Curtron Products

Curtron offers a complete line of Protecto™ Rack and Equipment covers. Protecto™ covers are available in various grades, including economy-style, medium, heavy duty, breathable mesh, and insulated. Each rack cover fits standard size racks.

DISPLAY COOLER CURTAINS

Curtron Products

Night Shades are pull-down display cooler curtains.

- Cut energy costs when coolers are not used
- Polyester film covers effectively maintain case temperatures
- Available for horizontal or vertical mounting in clear or translucent white material

Self Tapping Screws

Pull Tab
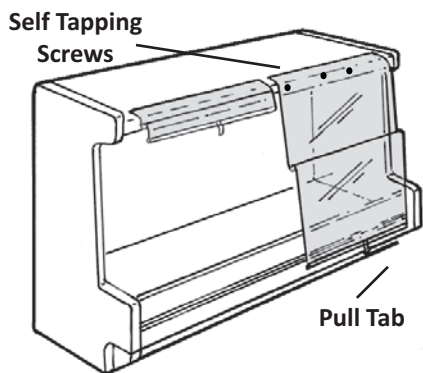

Model: NS-WHITE

Each Pull Down Night Shade mounts directly to the case. Pull Down Night Shades are self storing when not in use.

| Model	Material	Size	Mounting	Weight
NS-CLEAR*	Clear	48" W / Pull to 72" L	Vertical or Horizontal	3 lbs
NS-WHITE*	White	48" W / Pull to 72" L	Vertical or Horizontal	3 lbs
CUSTOM	Clear or White	Up to 48" Wide	Vertical or Horizontal	

*Included in Curtron's Quick-Ship Program - Check with your local utility company to see if Night Shades qualify for energy rebates.

Caser™ Cooler Curtains are reach-through, flexible clear curtains for display coolers.

- Keep in the cold air, preventing it from escaping or being contaminated by warm aisle air
- Clear, flexible PVC curtains with smooth edges allow for safe reach-through
- Perfect for grocery and convenient stores
- Casers™ are attached to the display case canopy with hook and loop fasteners
- No tools are required for installation
- Custom sizes are available for any size of refrigerated display case

Model	Material	Dimensions	Weight
C-24	Clear	48" W x 24" H	3 lbs

C-72	Clear	48" W x 72" H	6.5 lbs
C-84	Clear	48" W x 84" H	7.5 lbs
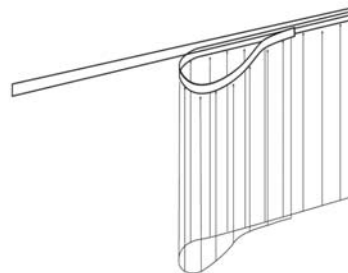

*Included in Curtron's Quick-Ship Program - Check with your local utility company to see if Casers qualify for energy rebates.

- Easy way to save money and energy
- Helps maintain temperatures in coolers and freezers
- Cuts energy costs
- Extends product shelf life, especially in the event of a power failure
- Multiple Night Shades can be installed side by side for wider openings
- Custom size Night Shades are available upon request

- Quick payback period - cut energy costs up to 40%
- Extends product shelf life
- Cuts refrigeration and heating costs and cuts compressor running time
- Helps keep customers in the cooled and frozen food sections longer by creating warmer aisles
- Light weight strips are easy to reach through
- Provides product protection during power failures

COOLKEEPER™ OVEN CURTAINS

Curtron's exclusive Coolkeeper™ oven curtain is ideal for pizza and other ovens in kitchen and restaurant areas. Coolkeepers™ are clear, reach-through curtains that direct oven heat toward the exhaust fan. The Coolkeeper™ consists of flexible, fire-retardant vinyl strips that attach to the oven hood with Velcro®. By forming an effective thermal barrier, the Coolkeeper™ increases exhaust and ventilation system efficiency.

STANDARD FEATURES
- 0.020" thick clear, UV stabilized, and fire retardant PVC strips
- See-through and reach-through design is simple to install
- "No-tear" eyelets keep vinyl from ripping or tearing
- Weighted bottom keeps strips hanging straight
- Velcro® strips attach to the exhaust hood and the PVC strips are attached to Velcro®
- Easy to clean - all parts are washable with soap and water
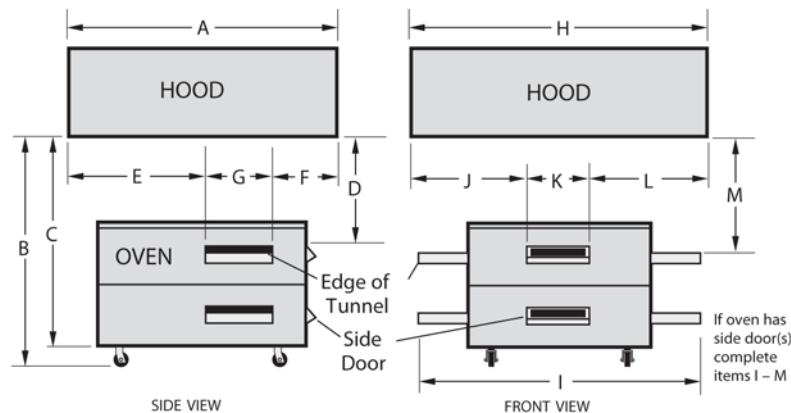

____ Three Sided

AIR-PRO™ NSF AIR DOORS

Curtron Products

Curtron's Air-Pro™ Air Doors are low profile units for commercial openings. The stainless steel design makes it the ideal food service door. Air-Pro™ air doors also help prevent flying insects and other airborne pollutants from entering through personnel openings.

STANDARD FEATURES
- 1/3 horsepower, two-speed motors
- 300 grade stainless steel housing, grill, nozzle, and blower wheels
- Heavy duty air directional vane
- Built-in high-low-off selector switch
- Runs on 120 volt/ single phase power and includes a three prong plug
- All Air-Pro™ Air Doors Include an automatic door plunger switch
- One year warranty on parts
- 4.9 amps per motor

Auto Door Plunger Switch

- NSF Approved for interior doorways up to 84" high

- Quick and easy to install

- All doors are in-stock in Curtron's quick-ship program

COMMON APPLICATIONS
- Commercial Entrances
- Bakeries
- Breweries
- Cafeterias
- Restaurants
- Supermarkets
- Warehouses
- Hotels
- Cold Storage
- Convenience Stores
- Commercial Kitchens

BENEFITS
- Reduce energy costs by separating environments

- Stop outside drafts, flying insects, and other airborne pollutants

- Recirculates warm air inside the building

- Increase employee and customer comfort

INSECT CONTROL (E-IBD) AIR DOORS

Curtron Products

Curtron's Insect Control Air Doors create a powerful stream of air that is sure to keep out flying insects and other airborne pollutants that can disrupt your environment. E-IBD units have high velocity motors and large blower wheels that produce an invisible wall of air, effectively separating your facility from outside contaminants.

FEATURES
- 3/4 horsepower motors
- Aluminized steel, one-piece construction
- Unmatched air flow uniformity
- Exceptionally low noise levels (63 dBA low speed)
- Five-year parts warranty for unheated units (18 months for heated units)

Activation Devices

Curtron Products

Commercial Series S-LP Air Doors are decorative air doors for commercial openings for hospitals, supermarkets, hotels, restaurants, casinos, and more.

- Approved for commercial doorways up to 96" high

- Available in 3' to 10' wide in full foot increments

COMMON APPLICATIONS
- Commercial Entrances
- Hospitals
- Supermarkets
- Casinos
- Banks
- Schools
- Restaurants
- Reception Areas

FEATURES
- 1/5 horsepower, variable-speed motors
- Stainless steel, one-piece construction
- Low profile design – only 8.5" high
- Unmatched air flow uniformity
- Includes filters for improved air quality
- Exceptionally low noise levels (53 dBA low speed)
- Electric, hot water, or steam heat optional
- Single-phase or three-phase power
- Five-year parts warranty for unheated units (18 months for heated units)
- Includes threaded inserts for top mounting

BENEFITS
- Prevents entry of hot or cold air
- Shuts out insects, dust, and fumes
- Increases employee and customer comfort
- Quick payback period

- Approved for industrial doorways up to 20' high

- Available in 3' to 16' wide in full foot increments

COMMON APPLICATIONS
- Warehouses
- Loading Docks
- Clean Rooms
- Distribution
- Food Production
- Manufacturing

- LI Series: For exterior openings up to 10' high

- MI Series: For exterior openings up to 12' high

- TMCA Series: For exterior openings up to 16' high

- TMCC Series: For exterior openings up to 20' high

Industrial Air Doors are designed to keep temperature, flying insects, and other airborne pollutants from entering through loading dock and garage door openings. Curtron has a full range of one-piece units that can accommodate loading dock and warehouse openings up to 16' wide.

- Stainless steel, one-piece construction
- Optional filters for improved air quality
- Unmatched air flow uniformity
- Exceptionally low noise levels (56 dBA low speed)
- Electric heat optional
- Single-phase or three-phase power
- Five-year parts warranty for unheated units (18 months for heated units)

Revolutionary Air Curtain with AERODYNAMIC Compression Chamber Generating "COANDA EFFECT" Air Movement

BENEFITS
- Prevents entry of hot or cold air
- Shuts out insects, dust, and fumes
- Increases employee and customer comfort
- Quick payback period - as quickly as 12 months

For more information on Industrial air doors, please contact your Curtron Products Sales Professional.

Curtron's line of Pest-Pro™ Silent Fly Traps are the perfect solution for flying insect control. Flying insects are attracted to high intensity UV lights and trapped to adhesive glue boards.

All Pest-Pro™ Silent Fly Traps are UL listed, run on 120 volt single phase power, include a three-prong plug, and carry a five year limited warranty. Replacement glue boards and high intensity UV lights are available. Contact Curtron Products for more information.

Pest-Pro™ Placement Recommendations

- Place traps 5-15 feet inside doorways. Wind can pull insects into the building.

- Space traps 25-50 feet apart on the inside of exterior wall lines. The number of traps needed are based on insect pressure, control levels, and visibility.

- Install fly traps 3 to 6 feet above the floor.

- UV lights need to be changed each spring. In areas with insect problems all year round, change UV lights twice a year, preferable in the spring and fall.

- Remember: Pest-Pro™ Silent Fly Traps are only effective if they can be seen by flying insects.

Pest-Pro™ Series 100: BL100
- Decorative wall sconce design in white or gold finish
- Covers 900 square feet
- Disposable 4" x 16" adhesive panels
- 15 watts of high intensity UV light
- Dimensions: 24" L x 10" H x 5" D

Pest-Pro™ Series 200: BL200
- For high traffic service areas such as kitchens or hallways
- White powder-coat finish
- Covers 1500 square feet
- Includes two disposable adhesive panels
- 30 watts of high intensity UV light
- Dimensions: 19" L x 10" H x 3.5" D

Pest-Pro™ Series 300: BL300
- Largest coverage area for high traffic service and sensitive areas
- White powder-coat finish
- Covers 1800 square feet
- Includes two disposable adhesive panels
- 80 watts of high intensity UV light
- Dimensions: 18" L x 10" H x 6" D

- Silently captures flying insects without the mess and noise of traditional bug zappers

- Meets USDA and FDA guidelines

- Insects are attracted to high intensity UV lights

- Insects are captured by adhesive boards inside

COMMON APPLICATIONS
- Restaurants
- Kitchens
- Hallways
- Hotels
- Grocery Stores
- Bakeries
- Casinos and Resorts
- Retail Stores
- Offices

BENEFITS
- Economical means of controlling flying insects in your food service establishment

- Helps your business comply with USDA and FDA guidelines

- Easy to install and replace glue boards and UV lights
