

HOME/BUSINESS THEATER SURGE PROTECTION

Home/Business Theater Power Centers & Surge Suppressors (including premium **isobar**® models)

Tripp Lite Power Centers and Surge Suppressors protect valuable home/business theater components from surge damage and line noise distortion—helping components perform at their peak. Includes premium Isobar models, the world's most trusted surge suppressor brand with over 16 million in use!

Protect

- *TVs* (high-definition, flat-panel, LCD, plasma, DLP)
- *Projectors* (DLP/LCD)
- *Receivers* (HD satellite, audio/video, digital cable)
- *Players/Recorders* (DVD, CD, VCR, PVR/DVR/TiVo®)
- *PCs/Servers* (media center, DVD/music server, computer)
- *Sound Systems* (amplifiers, preamplifiers, subwoofers)
- *Game Consoles* (Nintendo® Wii™, Microsoft® Xbox™, Sony® Playstation®)
- *And More!*

All models are rated for 120V AC (50/60 Hz) operation. All outlets are NEMA 5-15R. * Certifications vary by model. ** 16 LED models = "Protected" (surge suppression is working), "Grounded" (wall outlet is properly wired), "Power" (power is available at wall outlet), "Switched" (power is available at power center outlets), 6 "Input Voltage" LEDs and 6 "Current Usage" LEDs. 12 LED models = "Protected," "Grounded," "Power," "Switched," 4 "Outlet Selected" LEDs and 4 "Outlet On/Off" LEDs. 3 LED models = "Line OK" (wall outlet is properly wired), "Protected" and "Fault" (fault in wall outlet). 2 LED models = "Protected" and "Grounded." Video representations shown (before and after) are simulations. Actual results may vary. The policy of Tripp Lite is one of continuous improvement. Specifications are subject to change without notice. Actual products may differ slightly from photos. All trademarks are the property of their respective owners. Ultimate Lifetime Insurance is valid in the U.S. and Canada only.

Tripp Lite: Protecting & Powering Your System in Over 1,000 Ways

Tripp Lite offers over 1,000 power protection, power supply and connectivity products, including a full line of additional home/business theater solutions.

UPS Systems

Protect and support components through all power problems

- Reliable battery backup supports components (and their cooling fans) through blackouts and brownouts
- Prevents lost settings/programming and DLP/LCD bulb burnout
- Includes surge suppression and line noise filtering
- 750VA - 1500VA capacities

Audio/Video Cables

Provide all components with premium audio/video connectivity

- Audio/video cables/adapters, DVI, HDMI, FireWire, USB and more
- Gold connectors (most models) provide superior conductivity
- Premium shielding reduces signal loss
- Variety of lengths and connector options

KVM Switches

Control multiple computers from a single keyboard/monitor/mouse console

- Eliminates hardware and cable clutter
- Centralizes control over multiple computers
- Variety of ports and manageability options

Home/Business Theater

Power Centers & Surge Suppressors (including premium **isobar** models)

- ▶ Advanced Isobar Protection Technology
- ▶ Up to 5700 Joules
- ▶ Up to \$500,000 Ultimate Lifetime Insurance
- ▶ Up to 12 AC Outlets
- ▶ Signal Line Protection
Options: Coax, Tel/Modem, Ethernet

Protect Components Against Surge Damage

Every line connected to a home/business theater system presents a potential conduit through which damaging surges can strike. Tripp Lite Power Centers and Surge Suppressors safeguard valuable components on every power and signal line connection: AC, tel/modem, cable/satellite and network. Built-in protection circuitry shields components against damaging surges, including the most powerful ones, caused by direct lightning strikes. With the highest UL-verified surge-protection ratings in their class, Tripp Lite Power Centers and Surge Suppressors represent the best choice for component protection.* Isobar models feature larger and more robust surge-blocking components for the most effective protection available. Isobar models are the world's best-selling premium power centers and surge suppressors, with over 16 million in use! More people trust Isobar than all other premium surge suppressors combined!

* Surge protection is measured in joules; more joules mean more protection.

See & Hear the Difference As Components Perform at Their Peak

Tripp Lite Power Centers and Surge Suppressors help components perform at their peak (with sharper video and fuller audio) by filtering disruptive EMI/RFI line noise. Line noise filtering

eliminates audio static and video "snow" caused by radio transmissions, fluorescent lighting and appliances (such as refrigerators, air conditioners and microwaves). Isobar models feature exclusive Isolated Filter Banks, which provide an extra measure of line noise filtering between components. With Isolated Filter Banks, line noise generated by your receiver won't interfere with the performance of your TV.

Before Tripp Lite

After Tripp Lite

Cover Equipment with Up to \$500,000 Insurance

Up to \$500,000 Ultimate Lifetime Insurance guarantees your components will stay safe from surge damage, including direct lightning strikes, for life. Unlike competitors' policies, Ultimate Lifetime Insurance coverage begins the moment you purchase your Tripp Lite Power Center or Surge Suppressor, with no forms to fill out or send in. In addition, all Tripp Lite models are backed by a Lifetime Product Warranty and a rapid-response, no-questions-asked replacement policy unmatched in the industry.

Protect a Wide Variety of Components

Televisions

Receivers/Players/Recorders

PCs/Servers

Sound Systems

Game Consoles

Feature Focus

Tripp Lite Power Centers and Surge Suppressors offer a wide range of features to protect every component.

AC Protection

Protect up to 12 home/business theater components against damaging surges and disruptive EMI/RFI line noise on the AC line. AC

outlets are backed by up to 5700 joule of surge suppression, providing the highest levels of protection for sensitive electronics.

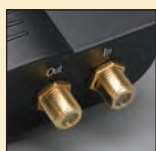

Isobar Isolated Filter Banks

Provide an extra measure of line noise filtering between components.

(Isobar models only.)

High-Definition (HD) Compatible Coaxial Protection

Gold-plated "F" connectors protect components against surge damage on DSS, satellite, cable or antenna lines. 2.2+ GHz bandwidth

provides compatibility with all digital signals for High-Definition (HD) video.

(HT706TV and HT706TSAT models feature non-HD, silver 1.8 GHz connectors)

Tel/Modem & Tel/Modem/Network Protection

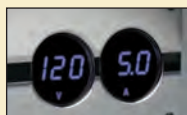

Protect Digital Video Recorders (TiVo) and other components against surge damage on a single pay-per-view, dial-up and/or Ethernet line.

Built in splitter on select

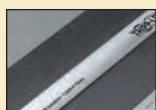

models protects two components sharing a single line. 2-line protection on select models protects 2 lines simultaneously.

Current Usage and Input Voltage Digital LED Display or LED Meter

Displays the total amperage load of all connected equipment and voltage of incoming utility power.

Durable All Metal or High-Impact Plastic Case

Stands up to demanding use and matches modern components.

Right-Angle Plug

Keeps power cord out of the way so components and furniture can be moved flush against the wall.

Color-Coordinated Outlet/Plug Labels

Coordinate Power Center outlets with equipment cords.

(HT1210ISOCTR, HT810ISOCTR, HTPOWERBAR10 and HT10DBS only)

Diagnostic LEDs

Identify power problems before they affect your valuable equipment.

Transformer Outlets

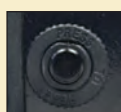

Accommodate multiple transformers without blocking other outlets.

Illuminated Master Switch

Provides power control over all components.

Circuit Breaker

Protects against dangerous overload. Breaker is separate or integrated into master switch.

Removable Rackmount Hardware & Console Feet

Adapts to rackmount (1U or 2U) and console applications.

(HT1210ISOCTR and HT810ISOCTR only)

Keyhole Slots

Provide convenient wall or cabinet mounting.

Fail-Safe Thermal Fusing (Not Shown)

Provides extra protection in the event of catastrophic surges.

Audible Alarm (Not Shown)

Immediately alerts you to damaged protection circuitry.

(HT1210ISOCTR, HT810ISOCTR, HT2210ISOCTR and HTPOWERBAR10 only)

"Digital", "Analog" & "High Current" Filter Banks

Protect digital and analog equipment and high-current equipment (such as amplifiers and subwoofers) against surge damage and line noise distortion.

(HT1210ISOCTR only)

Infrared (IR) Outlets & Remote

Can be controlled manually using front panel switches or remotely using the

included IR remote or a universal learning remote (user-supplied). Program the outlets to turn on or off individually or in a sequence.

(HT1210ISOCTR only)

Manual Outlet-Control Switches and LEDs

Select and turn on or off controllable IR outlets. Set the delay interval (0 - 30 seconds) when turning on or off multiple IR outlets in a

sequence using a remote.

(HT1210ISOCTR only)

Remote Infrared (IR) Sensor Input

Accepts a remote IR sensor (user-supplied), for use when the built-in sensor is covered.

(HT1210ISOCTR only)

Wall Mount Brackets

For secure, low-profile installation behind a TV.

(HT2210ISOCTR only)

AC/DC Control Jack

For remote power on/off with user-supplied switch.

(HT2210ISOCTR only)

Detachable 10 ft. and 18 in. Cords

Allows flexible placement relative to wall outlet.

(HT2210ISOCTR only)
