The pictures contained on the following pages are to assist in identifying and matching the correct clutches to use when installing a new one. Both sides of the pressure plate, and disc are shown along with the release bearing. Other items included in each kit are not shown or mentioned. These components include pilot bearings, alignment tools, bolts, and grease pack. The kits are in numerical order within the truck make which is in alphabetical order. When a kit is used in multiple makes, it will appear once only in the first make listed. In subsequent makes it will be listed at the end with a note as to where it can be found.

The aim of this guide is to help identify the correct parts needed on a clutch change. Refer to Valeo's printed catalog for specific application information or online at valeoclutches.com. To order parts or get technical assistance, please call Valeo's hotline at (888) 71-VALEO (82536)
