

## Measuring Equipment for Liquids and Gases

Competence for a global market

vemm tec measuring  
devices are in use night  
and day. In more than  
45 countries worldwide.

## Globally dedicated

As an internationally recognised producer and supplier of measuring instruments for liquids and gases, vemm tec enjoys an excellent reputation among users all over the world.

Founded in 1961 in Babelsberg near Berlin, the company has now branch offices in the Near and Far East and contact offices in 12 further countries. More than 70 percent of the total turnover is achieved by export activity.

Globally acting power corporations trust in the vemm tec brand. Tried and tested intelligent equipment and techniques, as well as innovative new and further development, mean our customers rely on our products. This trust has enabled vemm tec to increase sales by more than 20 percent annually over the past few years.

## Our reputation is our pledge

For vemm tec, quality and fair prices are part and parcel of a customer-oriented overall concept: Exemplary products, delivery on time and reliable service.

### Liquid metering equipment

Precise flowmeters for all liquid and viscous media and many applications.

### Gas metering equipment

High-tech measuring instruments for the natural gas industry and for all types of gases. With or without electronic data storage and transmission. For custody transfer measurements and industrial measurement.

### Analysing equipment

Stationary and mobile process gas chromatograph systems for the determination of the calorific value of natural gas, chemical composition and physical characteristics.

Our competence is based on four decades of experience. The company is certified according to ISO 9001 and ensures the high-quality standard of its products.

## Measuring equipment for liquids

Our oval gear meters are employed as volume and flow measuring devices and are approved by the PTB as custody transfer systems. Filters protect them from damage by foreign particles, deaerators prevent erroneous measurement. Remote transmission and alarm signalling is also possible by electronic equipment.

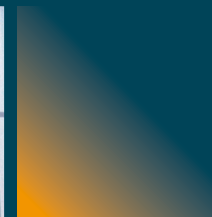

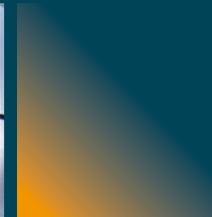

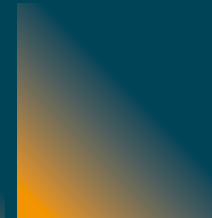

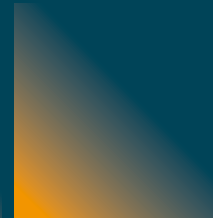

The vemm tec modular system provides for the optimum use of the oval gear meters in each measuring system. In combination with a counter, our instruments can be used as price calculators, difference calculators or batch meters.

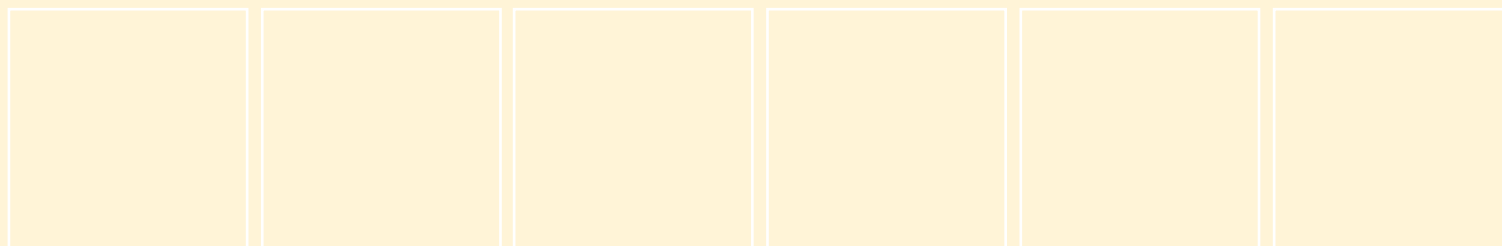

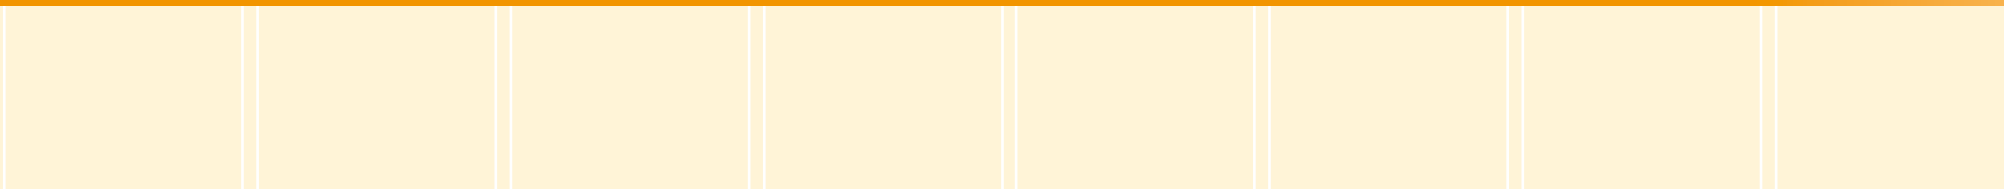

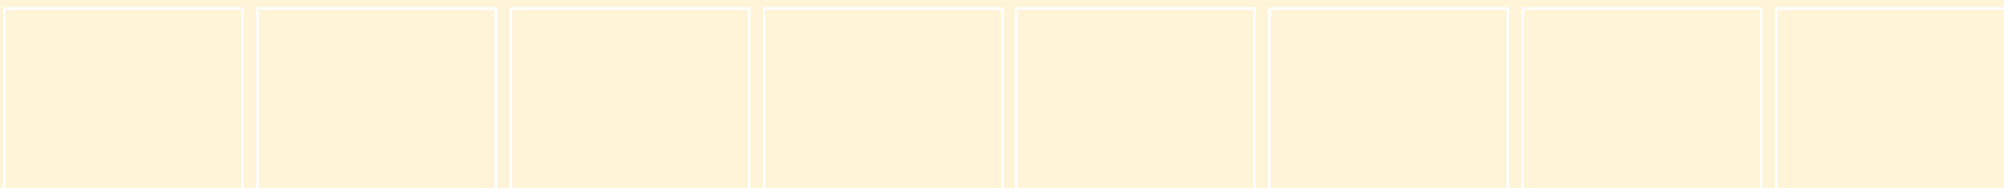

## Measuring equipment for gases

Various measurement tasks can be solved with our gas meters and converters. The instruments are approved both for custody transfer applications and for industrial measurements and they meet the highest demands as well as all national and international standards.

Equipment diversity and incorporated high-tech features make for high reliability and outstanding performance. Every measuring instrument is calibrated before delivery on state-approved in-house test stands.
