MARINE - STAINLESS STEEL PRODUCTS

The stainless steel products are designed to protect the cameras from particularly aggressive environmental conditions. Given the very severe specifications, the best materials available were used to make them, and each mechanical detail was carefully analyzed, obtaining products that are very reliable and resistant for industrial use and intense corrosion caused by sea salt. The range also offers some models designed to operate with thermal cameras.

DIGITAL VIDEO SYSTEMS

ALBERT is a distributed intelligence system that is based on the cooperation among units combined with a cutting edge movement analysis system. ALBERT is ideal for outdoor perimeter surveillance systems and all applications where it may be necessary to achieve simultaneous monitoring of a number of events, where operators are required to check a large number of cameras. The ALBERT system is Milestone supported.

KEY FEATURES

■ ASSISTED NAVIGATION

Proposes alternative live views of the event, to provide more perspectives and a better view.

■ FOCUS ON THE ALARMED AREA

When a unit detects an event it will send a priority message to the other units. At this point, all the available units will swiftly focus their cameras on the alarmed area.

■ AUTOMATIC RECORDING

The adjacent cameras will automatically record a number of films of the same event, providing alternative images from a variety of perspectives.

■ REDUNDANT SYSTEM

If any unit is tampered with, the adjacent cameras will cover the area of the redundant unit until it has been repaired.

■ INTELLIGENT PATROLLING

The units cooperate to achieve optimal cover of the areas, reducing the superimposing of cameras during patrolling.

EVENT DETECTION

- NO FALSE ALARM IN CASE OF:

MOVEMENT OF LEAVES

SHADOW VARIATIONS

LIGHT / WEATHER VARIATIONS

FLOATING OBJECT MOVEMENTS

VCA RULES

- IN ADDITION TO THE SELF-ADAPTING DETECTION OF EVENTS, THE USER CAN ESTABLISH A SERIES OF RULES, SUCH AS:

CAMERA TAMPERING

PROLONGUED PRESENCE INSIDE AN AREA

VIRTUAL FENCE

EVENT DETECTION: SCREENSHOT SAMPLES

NIGHT-VISION PARKING: FORBIDDEN AREA / INTRUSION.

THE NATURAL WATER MOTION IS CONSIDERED NORMAL, AND IT DOES NOT GIVE ANY FALSE ALARM.

TRAFFIC ROAD: TRIPWIRE.
