The Vitra Pro Novelties catalogue was prepared so that we can introduce Vitra's new products to you as your business partner.

You will be able to use this catalogue in a manner that is suitable to your workload, personal habits and preferences.

With the Vitra Pro Novelties catalogue it is very easy to obtain information, select products and review the related technical specifications. In order to make the right decisions when choosing your products, we recommend that you take a look at the product icons and icon legends. This way, at first glance you will see whether the product of your choice has the characteristics you are looking for such as whether it has water saving features or is suitable for special needs or not. The Vitra Pro Novelties Catalogue is a compilation of all of our new products for 2012 to include bathroom furniture, washbasins, WC pans, showering areas along with faucets and accessories, offering new creative solutions for your projects.

You will also find all the information found in the Vitra Novelties Catalogue and more by visiting the "professionals" section at our website: www.vitra.com.tr.

Blue Life

For our blue planet...

A pledge to the future.

Key data in diverse fields indicate the world could be at a critical juncture in terms of sustainability. The future of our blue planet is at stake, and as a major producer in the consumer goods sector with a global audience, Vitra is strongly aware of its responsibilities. Conservation of natural resources has long been a basic principle of the brand. Blue Life is set of guidelines embraced by Vitra to protect and preserve the living world. Vitra upholds Blue Life as a production, design and management philosophy.

Product information

Watersmart:

Cost saving, hygienic and environment-friendly

VitrA introduces the first waterless, cartridge-free and splash-free urinal.
Watersmart urinals are designed to protect the environment and to conserve water.

Watersmart waterless urinal

Besides its water saving feature, a cartridge is not required to operate the VitrA Watersmart waterless urinal. Watersmart urinals can be electrically or battery operated (2 year battery life).

Watersmart urinal with flushing function

There is also another version of Watersmart urinal which can be used with water and flush with minimum amount of water. Flushing frequencies are easily adjustable with the supplied remote control according to number of usage or time interval. A standard urinal can be replaced easily with Watersmart urinal with flushing function without any additional installation requirements.

Water Jewels: New colors, new sizes

Water Jewels washbasins are now available in a variety of new colors and patterns that enhance bathroom interiors with their eye-catching details.

Besides platinum, copper and gold tones, the series includes a variety of two-tone colors as well as the inner sections designed with patterns that transform Water Jewels into a unique series. Further enhancing the series is the selection of new sizes.

Water Jewels bowl washbasins are now available in 40cmx40cm (square) and 60cmx40cm (rectangular) options.

Besides the new colors in the Water Jewels series, washbasins with patterns that can be complemented with Vogue wall tiles are also available.

Multi-colored faucets

VitrA welcomed 2012 with colorful novelties. From now on, VitrA's quality will be evident in bathroom interiors with matt black and white faucets besides the the traditional chrome faucets.

With its superior designs and cutting edge technology, Ross Lovegrove's İstanbul collection is now available in two new colors.

The source of inspiration for Style X's innovative design was water and the series has now been enhanced and is available in matt black and white. The same colors are also available in the T4 and Q-Line faucet series.

Juno *made with Swarovski elements*

The natural sparkle of crystal shines in bathroom interiors with the Juno series.

A lavish bathroom interior ambiance is created with original Swarovski crystal joysticks and faucet rings enhanced with fine details.

Enjoy 2

Individualized comforts of a shower are carried to bathroom interiors with Enjoy 2. It can be used without the need for a standard shower tray or bathtub and it has individually controlled massage jets that can be adjusted for personal use.

Enjoy 2's distinctive features include individually controlled massage jets that can be adjusted for different body types and parts of the body or if desired, each massage jet can be turned off individually.

Eco Enjoy has a showerhead and hand shower with different water flow options.

Universal toilet seat

No noise, soft close, antibacterial and compatible with all types of WC pans: all of these characteristics are available with the universal toilet seat – the world's most "thoughtful" WC pan cover.

Because of the tipping body, the Universal toilet seat closes slowly and gradually without making any noise and a hygienic environment is attained with its antibacterial feature. The Universal toilet seat can easily be mounted to a WC pan and the other important features of the product is that it is compatible with all types of WC pans and was produced with a heavy-duty substance called duroplast.

T4 HydroClean faucet

HydroClean technology and the T4 faucet come together

With HydroClean technology, water flows in a circular fashion instead of spreading out, so contact between water and the faucet and water stains are reduced to a minimum.

Water droplets will spread out with faucets that do not use HydroClean technology.

As a result of T4 HydroClean technology, water droplets flow easily on slanted surfaces and stains such as lime and soap residue are easily cleaned from flat surfaces.

Bathroom furniture

: The area where the waste outlet (Ø 50 mm) can be placed in.

A : Ideal position of the waste outlet (Ø 50 mm). The end point of the waste outlet should not be cut out and should be left at least 10 mm above the surface.

B : The area (Ø 200 mm) where the waste outlet should not be left.

C : Hot & cold water inlet for the wall taps.

E : Mains connection.

Notte

With seat-IonFresh shower system

Code: 5587

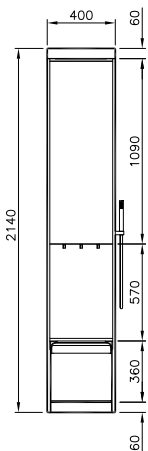

Size (cm): 214x40

Weight (kg): 34

- Hidden faucet
- Top body massage jets
- Handshower
- Showerhead with LED lighting
- Shelf
- Foldable shower seat

IonFresh Benefits:

- Prevents sticking of dust on the wall and asthma attack caused by dust.
- Eliminates viruses
- Eliminates bacterium.
- Deactivates allergen.
- Helps to prevent mold growth.

- The local water pressure should be in between 3-6 bars.
- The IonFresh System is running with electricity.

Code: 5587

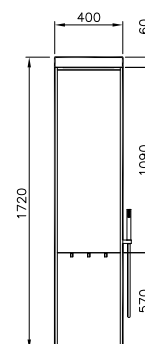

Size (cm): 172x40

Weight (kg): 28

- Hidden faucet
- Top body massage jets
- Handshower
- Showerhead with LED lighting
- Shelf

IonFresh Benefits:

- Prevents sticking of dust on the wall and asthma attack caused by dust.
- Eliminates viruses
- Eliminates bacterium.
- Deactivates allergen.
- Helps to prevent mold growth.

Maintenance

Important features

- Acrylic is resistant to acids and alkalines; however avoid contact of your product with organic substances, like paint removers, acetone and other solvents.
- Keep lit cigarettes away from your product.
- Do not remove the protective film prior to finishing all installation work in your bathroom, in order to keep the product fully protected.

Cleaning of the product

For all products:

- Immediately after each use, clean your product with a bath cleaner or a lime solvent, a soft cloth and warm water. Otherwise, soap, dirt or lime can form a thin layer on the acrylics and make cleaning more difficult.
- Do not use hydrochloric acid, abrasive powder detergents, soft soap or hard scouring sponge pads to clean your product.

For whirlpool bathtubs, shower systems and compact systems:

- All chrome parts of the products can be de-mounted. It is recommended that you de-mount these parts at least once a month to prevent corrosion. In case the product contacts with hard water, the parts should be cleaned using lime removers. You will find further information about this subject under the heading "Maintenance of Chrome Parts".

Maintenance of chrome parts

- The chrome parts of whirlpool bathtubs, shower systems and compact systems may display lime residue build-up after frequent contact with lime (hard) water.
- The chrome parts should be de-mounted according to the instructions and should regularly be cleaned using a residue dissolving material.

Troubleshooting

Product	Problem	Solution
<ul style="list-style-type: none"> For shower trays, shower systems, compact systems 	<ul style="list-style-type: none"> The surface of the product is dull or scratched. 	<ul style="list-style-type: none"> If your product is new, the thin film layer may not have been removed. If your product is dull or scratched, you may not be using the right cleaning materials. Please check the chapter "Cleaning of the Product."
<ul style="list-style-type: none"> For shower trays 	<ul style="list-style-type: none"> Water leaks through the bottom of the product. 	<ul style="list-style-type: none"> Please check that silicone has been applied between product and wall.
<ul style="list-style-type: none"> For compact systems 	<ul style="list-style-type: none"> Massage system does not work. 	<ul style="list-style-type: none"> Make sure that the water level is 3 cm higher than the jets.
<ul style="list-style-type: none"> For bathtubs, shower trays, compact systems 	<ul style="list-style-type: none"> Waste is blocked quite often. 	<ul style="list-style-type: none"> Hair, soap etc. may be blocking the waste. Clean the waste with an unblocking agent.
<ul style="list-style-type: none"> For shower systems 	<ul style="list-style-type: none"> Little or no water comes from the jets. 	<ul style="list-style-type: none"> In order to get utmost efficiency from your shower system, you should operate it at a water pressure of at least 3 bar (43.5 psi).
<ul style="list-style-type: none"> For compact systems with steam system 	<ul style="list-style-type: none"> No steam appears. 	<ul style="list-style-type: none"> Ensure water is supplied to the system. Check if the command panel light is on.
<ul style="list-style-type: none"> For compact systems 	<ul style="list-style-type: none"> Water leaks from the edges of the cabin. 	<ul style="list-style-type: none"> Check that silicone is applied to all joints of the cabin.
<ul style="list-style-type: none"> For and compact systems 	<ul style="list-style-type: none"> Waste cover doesn't open when the control lever is turned. 	<ul style="list-style-type: none"> If the control lever is forced, the waste pulley wire may snap. However, the height of the waste cover can be adjusted by turning the cover counter clockwise.

Compact systems

FUNCTIONS	PICTURE	PROPERTY	COMPACT SYSTEM (SHOWER TRAYS)	COMPACT SYSTEM (BATHTUBS)
ELECTRONIC CONTROL UNIT		Controls steam sauna, radio, light and chromatherapy. (There are differences between systems)		
CHROMOTHERAPY		Chromotherapy is controlled from the control panel; it is installed on the ceiling of the product. Seven different colours of light change in every 30 seconds.	(Optional)	(Optional)
VERTICAL WATER JET		The system consists of water jets all of which are chrome plated brass. (number of jets depend on the model)		
HAND SHOWER		Hand shower system with shower rod and flexible hose. (Easy clean and water safe)		
HEAD SHOWER		Installed on the ceiling of the compact system.		
WATER CONTROL MIXER (CHROME)		Diverts water to come out of the compact system. (Thermostatic)		
LIGHT		Light is controlled from the control panel; it is installed on the ceiling of the product.	(Optional)	(Optional)
STEAM OUTLET		Provides steam outlet. You should not get too close while sauna is functioning.		
SPEAKER		Output for radio.	(Optional)	(Optional)

• The system functions under 220-230V (50hz) voltage; 16 A current. Switch 16 Amper fuse off while you are not using the device. Water pressure must be between 3-6 bar for water jets to function properly.

Icon legends

Water savings

Developed by Vitra, the WC pans designed with a special cistern structure and connectors that only require 2,5/4 L water flow have been endorsed according to EU standards for requiring the least amount of water for flushing.

When Vitra's recessed cistern is used with the special cistern structure, up to 70% water savings is achieved.

Compared to standard urinals, the Vitra Watersmart urinals require a significantly less amount of water for flushing.

The Watersmart dry urinal exclusively designed with no cartridge uses no water at all and saves approximately 144 tons of water annually. On the other hand, the Watersmart urinal with flusher with its adjustable flushing system requires a minimal amount of water for flushing.

No Stain

Limescale is persistent in most bathrooms. VitraClean technology is a special double-glazing process that makes washbasins, WC pans, urinals and bidets water repellent. No harsh chemical cleaning agents are needed to keep them beautifully stain-free for years.

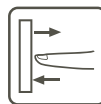

Sensor

The sensor technology used with Vitra's concealed cistern systems enable users to operate the flusher system without having to touch the lever panel, offering hygiene conditions in open public area bathrooms. At the same time conserving water, according to the value set, the sensor can flush 3/6 L of water.

No Bacteria

In moist environments, an extra degree of protection is needed to deter bacteria. VitraHygiene is a unique glazing process available on all ceramic sanitaryware (washbasins, WC pans, bidets and urinals). By adding silver ions to the raw glaze it offers almost 100% protection against the spread of bacteria. Extremely hard-wearing, VitraHygiene glaze will last the lifetime of any product it's been applied to.

Push-to-open

Designed handle-free for a streamlined look, drawers / doors spring open with a simple push.

Special needs

The bathroom products are designed for the elderly and people with special needs. The products offer practical solutions in bathrooms and can be used with wheelchairs as well.

Integral lighting

Stylish and functional special lighting system integrated high on the mirror.

Natural veneer

The surfaces of all the wood furniture is covered with natural veneer.

Water saving

The special aerator with flow regulator used in VitrA faucets decreases water flow from 12 L/minute to a maximum flow of 9 L/minute, resulting in a 40% savings on water consumption.

The temperature and water flow regulator cartridge allows users to set a maximum limit for flow, resulting in up to 90% savings on water consumption

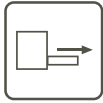

Soft closing

Special mechanism slows down drawer closing motion, providing safety to children and seniors.

Energy saving

The special cartridge with temperature regulator used in VitrA faucets allows users to set the maximum temperature of the water on the gray ring on the cartridge preventing excessive and unnecessary use of energy.

Full extension

Drawers extend in full, providing convenience and maximizing space use.

No calc

The exclusively designed silicone aerator provides one touch cleaning of the lime buildup at the tip of the spout. The "Easy Cleaning" feature found in the shower systems ensures that lime and impurities in the water ducts are easily cleaned.

Autoclean aerator

Residuals and particles up to 0.7 mm are discharged automatically and even with heavy use, will not clog the system. It is not necessary to detach the aerator to remove the remains. Ensures smooth flow even in hard conditions.

Calibration is required during installation

In order for the product to technically operate properly, the product should be installed / calibrated by representative technical person.
