Bathroom Collections

VitrA

Contents

The VitrA Pro Bathroom Collections catalogues were prepared so that they can play a role as business partners for you, our professional colleagues.

You will be able to use these catalogues according to your personal preferences and based on your work schedules and usage habits. It is quick and easy to get information, select products and review technical specifications with our Bathroom Collections catalogue. Additionally, we have revised our icons so that we can assist you during your decision making process. As a result, for example, at first glance, you can see whether the products you want have water savings features or whether they are suitable or not for physically challenged users. We suggest that you review the icon legend before examining the catalogue. The icons will provide you with the information you need to make the right choices easily. Further, you will find information on new products and innovative solutions for your projects in the VitrA Pro catalogue.

The VitrA Pro Bathroom Collections catalogue includes details on all sanitary ware, bathroom furniture, mixtures and accessories and is supplemented with catalogues on VitrA's washbasins, WC pans, bathtub & shower trays and complementary products.

Visit the professional users section at our website **vitra.com.tr** where you will find all the information found in the VitrA Pro Bathroom Collections catalogue as well as more detailed data.

Blue Life

For our blue planet...

A pledge to the future.

Key data in diverse fields indicate the world could be at a critical juncture in terms of sustainability. The future of our blue planet is at stake, and as a major producer in the consumer goods sector with a global audience, VitrA is strongly aware of its responsibilities. Conservation of natural resources has long been a basic principle of the brand. Blue Life is set of guidelines embraced by VitrA to protect and preserve the living world. VitrA upholds Blue Life as a production, design and management philosophy.

Retro

The Retro series reflects the sentimental emotions of the 1960's: the very popular style is born again in bathroom interiors. The furniture produced in gold cherry and chocolate wood are in total harmony with washbasins and WC pans.

Technical Specifications

Icon legends

Water savings

Developed by VitrA, the WC pans have been certified for using the least amount of water according to EU standards. The WC pans special cistern structure and WC pan connectors ensure 2.5/4 L flow.

No Stain

Limescale is persistent in most bathrooms. VitrAclean technology is a special double-glazing process that makes washbasins, WC pans, urinals and bidets water repellent. No harsh chemical cleaning agents are needed to keep them beautifully stain-free for years.

No Bacteria

In moist environments, an extra degree of protection is needed to deter bacteria. VitrAhygiene is a unique glazing process available on all ceramic sanitaryware (washbasins, WC pans, bidets and urinals). By adding silver ions to the raw glaze it offers almost 100% protection against the spread of bacteria. Extremely hard-wearing, VitrAhygiene glaze will last the lifetime of any product it's been applied to.

Special needs

The bathroom products are designed for the elderly and people with special needs. The products offer practical solutions in bathrooms and can be used with wheelchairs as well.

Sensor

The sensor technology used with VitrA's concealed cistern systems enable users to operate the flusher system without having to touch the lever panel, offering hygiene conditions in open public area bathrooms. At the same time conserving water, according to the value set, the sensor can flush 3/6 L of water.

Push-to-open

Designed handle-free for a streamlined look, drawers / doors spring open with a simple push.

Integral lighting

Stylish and functional special lighting system integrated high on the mirror.

Natural veneer

The surfaces of all the wood furniture is covered with natural veneer.

Soft closing

Special mechanism slows down drawer closing motion, providing safety to children and seniors.

Full extension

Drawers extend in full, providing convenience and maximizing space use.

Water saving

The special aerator with flow regulator used in VitrA faucets decreases water flow from 12 L/minute to a maximum flow of 9 L/minute, resulting in a 40% savings on water consumption.

The temperature and water flow regulator cartridge allows users to set a maximum limit for flow, resulting in up to 90% savings on water consumption

Energy saving

The special cartridge with temperature regulator used in VitrA faucets allows users to set the maximum temperature of the water on the gray ring on the cartridge preventing excessive and unnecessary use of energy.

No calc

The exclusively designed silicone aerator provides one touch cleaning of the lime buildup at the tip of the spout. The "Easy Cleaning" feature found in the shower systems ensures that lime and impurities in the water ducts are easily cleaned.

Autoclean aerator

Residuals and particles up to 0.7 mm are discharged automatically and even with heavy use, will not clog the system. It is not necessary to detach the aerator to remove the remains. Ensures smooth flow even in hard conditions.

Calibration is required during installation

In order for the product to technically operate properly, the product should be installed / calibrated by representative technical person.
