## Quality:

The durability of Vitra's bathtubs and shower trays has been certified according to international standards and are manufactured with Lucite cast acrylic sheets.

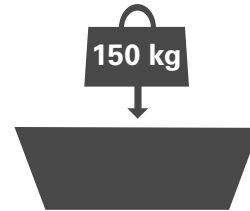

## Performance Test:

All Vitra hydromassage products are subject to 100% performance testing. The hydromassage pumps are tested to withstand electric currents up to 1100 V.

## Functionality:

The pipes and assembly attachments of Vitra's bathtubs, shower trays and compact systems have been developed to ensure problem free use with special waste systems to prevent contamination and clogging.

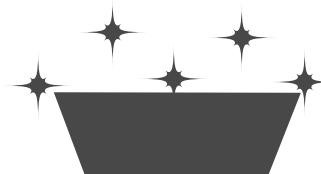

## Durability:

Vitra bathtubs are supported at 6 points. The strength of all products are measured with a durability test to withstand a weight of 150 kg.

## Aging Test:

The deterioration and abrasion resistance of the acrylic sheets used at Vitra products is tested by a 10-year going test supplemented by TÜBİTAK (The Scientific and Technological Council of Turkey).

## Hygiene:

Hygienic acrylic sheets are used with all Vitra shower systems, bathtubs and shower trays to ensure superior hygiene conditions.

# VitrA compact systems, compact units, bathtubs and shower trays specifications

All VitrA bathtubs and shower trays are manufactured with 100% cast acrylic sheets. This guarantees the long life of the colors, resistance to chemicals and cosmetic products and ensures superior hygiene conditions and installation/repair maintenance.

The colors of the wood paneled bathtubs can be used throughout the bathroom to bring out the warmth of the wood, and also to create a harmonious environment.

The contours of the Vitra bathtubs emulate the shape of the body, carrying the ergonomic design to a maximum level. The hydromassage control buttons have been installed in easy reach enhancing comfort of the bath experience.

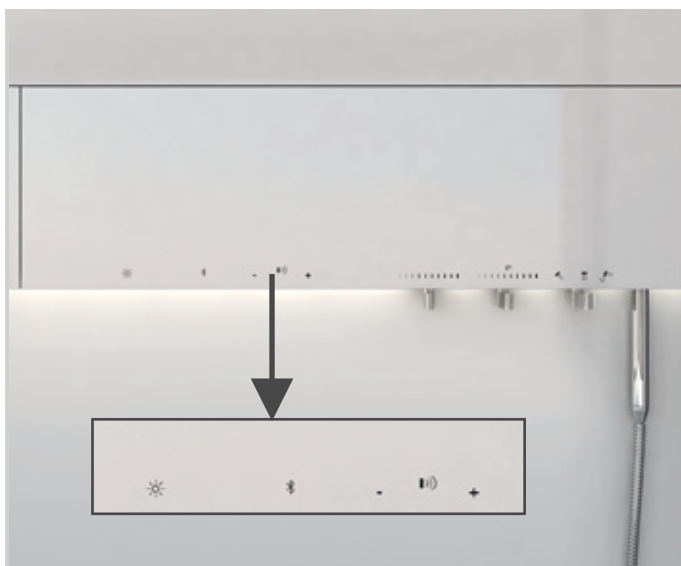

The bathtubs and paneled shower trays are provided with galvanized steel leg sets and adjustable legs to ensure that the products are sturdy, balanced and precisely levelled.

The compact system and some of the compact shower units are equipped with the chromotherapy feature, that uses color and light to maintain the body's physical, emotional, spiritual and mental energies in balance.

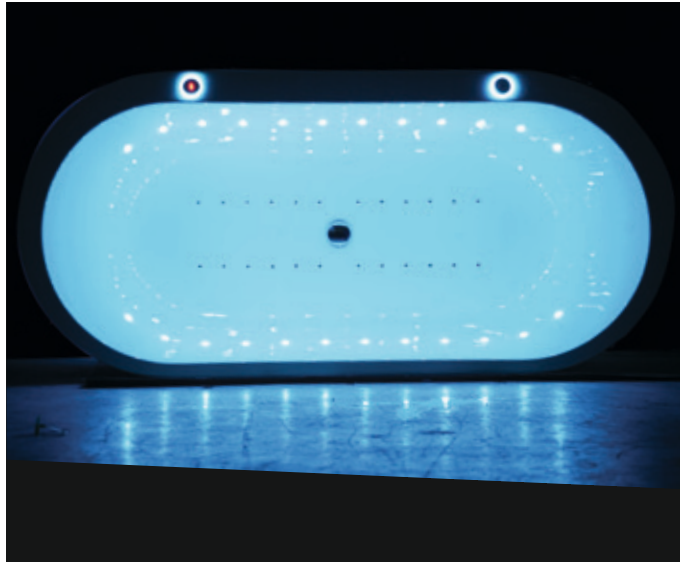

You can continue to enjoy listening to music with the Bluetooth connection music system in your bathroom.

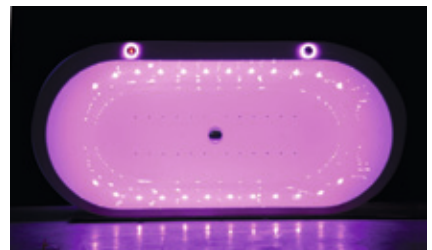

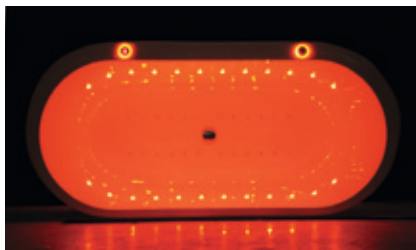

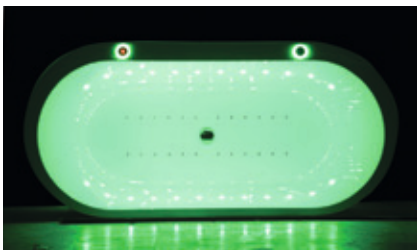

Natural Iroko wooden floor matts improve the comfort and aesthetics of the bathroom and can be utilized either at entire showering area or just at drying part.

You can enjoy a comfortable bath experience with the offset bathtubs and shower trays while saving space at especially small bathrooms.

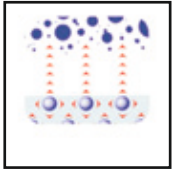

Various combinations of water and air jets provide alternative hydromassage systems from soft to intense massage, or soothing ambiance to light therapy.

# VitrAhygiene

For the ultimate bath experience... imagine a bathtub filled with warm water and lots of bubbly suds. It's just what you need to "purify" your body and soul and reach a state of serenity. Since an enjoyable bath experience is not just restricted to this: VitrA introduces VitrAhygiene, an innovation revolutionizing the art of "purification".

The acrylic bathtubs and shower trays are pore-free and have a homogenous finish that naturally protects users from the threat of bacteria. The VitrAhygiene technology ensures that bacteria does not form on acrylic surfaces and takes this "natural" prevention to higher levels. The bathtubs and shower trays manufactured with VitrAhygiene technology continuously provide a hygienic environment by preventing bacteria and always remain clean and shiny with regular cleaning.

Besides being a leader in the manufacturing of acrylic bathtubs and shower trays, VitrA further supports the development of contemporary bath concepts with investments. With VitrAhygiene, VitrA is now one step ahead with superior service approach and cutting edge technology.

The main component used in the manufacturing of bathtubs and shower trays with VitrAhygiene technology is Lucite Care acrylic sheets, developed by UK based Lucite International. This property of the sheets have been tested and approved by Law Laboratories, Ltd., a leading UK based lab and other independent laboratories. The anti-bacterial additives added to the acrylic polymers during the manufacturing stage, providing enhanced hygiene conditions compared to its counterparts.

## VitrA hygiene

Thanks to Microban technology, VitrAhygiene products' anti bacterial property lasts for long years, providing superior hygiene and protection without creating any health risks for users. They do not contain any of the toxins, allergens or other additives usually found in many products like toothpastes, deodorants or anti bacterial soaps.

# Hydromassage systems

The high pace and pressures of day to day life are stressful. The best way to clear your mind and body is by lying down in a relaxing bathtub and surrendering to the tides of water. Vitra offers 7 alternative hydromassage systems that promise a unique massage experience.

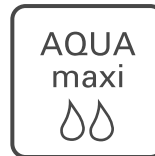

An electrically operated massage system with 300 nano water jets and equipped with 4 diverters for localized body massages.

An electrically operated, 7 to 9 function massage system with 18 micro water and 10 air jets.

An electrically operated, 5 to 7 function massage system with 6 water and 10 air jets.

An electrically operated, 4 function massage system with 18 micro water jets.

An electrically operated massage system with 24 air jets and changing light control of 24 LEDs.

An electrically operated, two function massage system with 6 water jets and air controlled pump.

Single function massage system with 6 water jets and air controlled pump.

# Blue Life

For our blue planet...

## A pledge to the future.

Key data in diverse fields indicate the world could be at a critical juncture in terms of sustainability. The future of our blue planet is at stake, and as a major producer in the consumer goods sector with a global audience, Vitra is strongly aware of its responsibilities. Conservation of natural resources has long been a basic principle of the brand. Blue Life is set of guidelines embraced by Vitra to protect and preserve the living world. Vitra upholds Blue Life as a production, design and management philosophy.

## A bathtub that requires less water

The bathtubs in the Water Jewels and Balance collections require less use of water with their exclusive design and their low interior height. As the Water Jewels bathtub's external height is only 42 cm, it is easier getting in and out of the bathtub for the elderly and disabled.

## Technical Specifications

# Maintenance

## Important features

- Acrylic is resistant to acids and alkalines; however avoid contact of your product with organic substances, like paint removers, acetone and other solvents.
- Keep lit cigarettes away from your product.
- Do not remove the protective film prior to finishing all installation work in your bathroom, in order to keep the product fully protected.

## Cleaning of the product

For all products:

- Immediately after each use, clean your product with a bath cleaner or a lime solvent, a soft cloth and warm water. Otherwise, soap, dirt or lime can form a thin layer on the acrylics and make cleaning more difficult.
- Do not use hydrochloric acid, abrasive powder detergents, soft soap or hard scouring sponge pads to clean your product.

For whirlpool bathtubs, shower systems and compact systems:

- All chrome parts of the products can be de-mounted. It is recommended that you de-mount these parts at least once a month to prevent corrosion. In case the product contacts with hard water, the parts should be cleaned using lime removers. You will find further information about this subject under the heading "Maintenance of Chrome Parts".

## Disinfection of whirlpool bathtubs

- It is recommended that you disinfect your whirlpool bathtub at least once a month.
- The Duo Maxi hydromassage system includes an Automatic Disinfection Program for the bathtubs.
- For bathtubs with other systems, cleaning should be done as follows:
  - Fill the bathtub with water (the water level should be approx. 3 cm above the jets).
  - Pour a sufficient amount of disinfectant in the bathtub. Avoid contact of the skin with disinfectant.
  - Run the system for 3 minutes in order the disinfectant to be penetrated to the entire system.
  - Stop the system and wait 10 minutes.
  - Run the system again for 3 minutes.
  - Stop the system again and wait a further 10 minutes.
  - Finally, run the system again for 3 minutes.
  - Drain the water from the bathtub and refill with clean water.
  - Run the system for 2-3 minutes with clean water, then drain again.

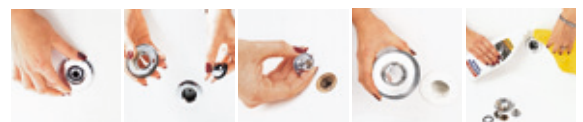

## Maintenance of chrome parts

- The chrome parts of whirlpool bathtubs, shower systems and compact systems may display lime residue build-up after frequent contact with lime (hard) water.
- The chrome parts should be de-mounted according to the instructions and should regularly be cleaned using a residue dissolving material.

Maintenance of chrome parts of shower systems and compact systems

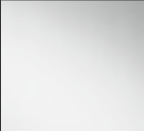

Maintenance of chrome parts of your whirlpool bathtub

# Troubleshooting

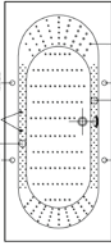

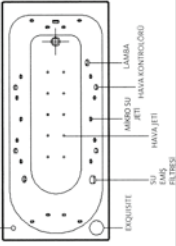

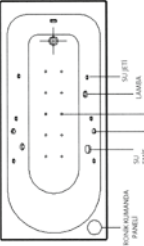

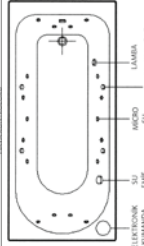

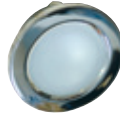

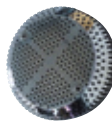

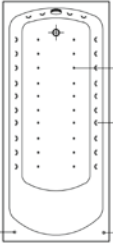

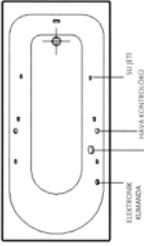

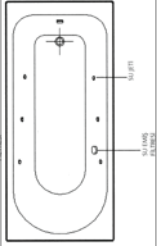

Product	Problem	Solution
<ul style="list-style-type: none"> <li>For bathtubs, whirlpool bathtubs, shower trays, shower systems, compact systems</li> </ul>	<ul style="list-style-type: none"> <li>The surface of the product is dull or scratched.</li> </ul>	<ul style="list-style-type: none"> <li>If your product is new, the thin film layer may not have been removed.</li> <li>If your product is dull or scratched, you may not be using the right cleaning materials. <ul style="list-style-type: none"> <li>For shower systems</li> </ul>	<ul style="list-style-type: none"> <li>Little or no water comes from the jets.</li> </ul>	<ul style="list-style-type: none"> <li>In order to get utmost efficiency from your shower system, you should operate it at a water pressure of at least 3 bar (43.5 psi).</li> </ul>
<ul style="list-style-type: none"> <li>For compact systems with steam system</li> </ul>	<ul style="list-style-type: none"> <li>No steam appears.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure water is supplied to the system. Check if the command panel light is on.</li> </ul>
<ul style="list-style-type: none"> <li>For compact systems</li> </ul>	<ul style="list-style-type: none"> <li>Water leaks from the edges of the cabin.</li> </ul>	<ul style="list-style-type: none"> <li>Check that silicone is applied to all joints of the cabin.</li> </ul>
<ul style="list-style-type: none"> <li>For bathtubs and compact systems</li> </ul>	<ul style="list-style-type: none"> <li>Waste cover doesn't open when the control lever is turned.</li> </ul>	<ul style="list-style-type: none"> <li>If the control lever is forced, the waste pulley wire may snap. However, the height of the waste cover can be adjusted by turning the cover counter clockwise.</li> </ul>
<ul style="list-style-type: none"> <li>Whirlpool bathtubs</li> </ul>	<ul style="list-style-type: none"> <li>After using Duo Maxi and Duo Soft whirlpool bathtubs and draining the water, the system starts working automatically.</li> </ul>	<ul style="list-style-type: none"> <li>This is not a problem. The hydromassage system on Duo Maxi and Duo Soft models will circulate air in order to dry out the pipes, approximately 20 minutes after the water has been drained. This process serves to improve the hygiene of your hydromassage system.</li> </ul>

## Compact Systems

FUNCTIONS	PICTURE	PROPERTY	COMPACT SYSTEM (SHOWER TRAYS)	COMPACT SYSTEM (BATHTUBS)
ELECTRONIC CONTROL UNIT		Controls steam sauna, radio, light and chromatherapy. (There are differences between systems)	✓	✓
CHROMOTHERAPY		Chromotherapy is controlled from the control panel; it is installed on the ceiling of the product. Seven different colours of light change in every 30 seconds.	✓ (Optional)	✓ (Optional)
VERTICAL WATER JET		The system consists of water jets all of which are chrome plated brass. (number of jets depend on the model)	✓	✓
HAND SHOWER		Hand shower system with shower rod and flexible hose. (Easy clean and water safe)	✓	✓
HEAD SHOWER		Installed on the ceiling of the compact system.	✓	✓
WATER CONTROL MIXER (CHROME)		Diverts water to come out of the compact system. (Thermostatic)	✓	✓
LIGHT		Light is controlled from the control panel; it is installed on the ceiling of the product.	✓ (Opsiyonel)	✓ (Opsiyonel)
STEAM OUTLET		Provides steam outlet. You should not get too close while sauna is functioning.	✓	✓
SPEAKER		Output for radio.	✓ (Opsiyonel)	✓ (Opsiyonel)
MIRROR			✓	✓
WATER OUTLET		The device on the beak diverts water coming out of tap towards hand shower.		✓

• The system functions under 220-230V (50hz) voltage; 16 A current. Switch 16 Amper fuse off while you are not using the device. Water pressure must be between 3-6 bar for water jets to function properly.
