WHY CHOOSE HAND DRYERS?

The benefits of using hand dryers over paper towels

Hand Dryers

ENVIRONMENTAL

Hand dryers save trees from being cut down and made into paper towels.

Paper towels can be made from recycled paper, but they cannot be recycled. They create millions of cubic feet of waste in landfills.

The production of paper towels is twice as energy-intensive as the use of hand dryers and creates more greenhouse gases.

It takes more energy to produce 2 paper towels than it does to run a typical high speed hand dryer.

To make one ton of recycled paper, it takes 7,000 gallons of water, 158 million BTUs of energy; and 60 pounds of pollutants go into the atmosphere.

Over its lifetime, just one hand dryer will produce 3.0 tons less CO₂ than the production of the towels it replaces. (4.6 tons vs 1.6 tons of CO₂)

A school using 30 hand dryers saves one ton, or 17 trees worth of paper towels per year.

The United States Postal Service identified hand dryers as the single most cost and waste reduction alternative in their Pollution Prevention Study.

FINANCIAL

Hand dryers operate on pennies a day.

Installing hand dryers in public washrooms reduces hand drying expense by an average of 90-95% when compared to paper towels.

The average payback for hand dryers is 12-18 months.

Paper costs continue to rise.

MAINTENANCE

The use of paper towels involves constant ordering, stocking, cleaning, and disposal.

Hand dryers eliminate paper towel waste and disposal issues, including plumbing problems due to clogged paper towels.

SAFETY AND VANDALISM

Paper towels clog toilets, litter floors and can be fire hazards.

World Dryers® are built to take abuse.

Overflowing trash bins are a source for potential fires.

The cast iron models are literally bullet proof.

HYGIENIC

Hand dryers are more sanitary than paper or linen roller towels.

The AirForce™ dryers are embedded with SteriTouch anti-microbial additive to protect from the build-up of germs, mold and bacteria.

Hand dryers eliminate paper towel waste and disposal issues.

Dirty towels overflow and litter floors.

Studies have found that hand dryers can reduce the spread of micro-organisms compared to paper towels.

Touchless dryer models prevent contamination of buttons, knobs and levers.

Bacteria laden paper towel waste creates a negative image for your customer's business.

CONVENIENCE

Run out of towels? No worries with hand dryers.

Hand dryers are always on duty.

Planning Guide

PLANNING GUIDE

The environmentally responsible method to dry your hands

QUANTITY ESTIMATE

Average traffic: 1 dryer per 2 washbasins

Heavy traffic: 1 dryer per washbasin

54" Bradley sink: 4 dryers per sink

DRYER PLACEMENT

Hand dryers should be placed at least 2 feet apart, near but not over the washbasin. In congested areas dryers should be placed to create a traffic flow from wash basin to dryer to exit. Automatic dryers should be placed more than 18" above or away from projections, which may interfere with the operation of the automatic sensor.

AirMax™ XM5-972
Automatic, Surface Mounted

J-970
Surface Mounted

SPECIFICATIONS

Airforce™ Model J, J4, and J48 hand dryers shall be manufactured by or for World Dryer® Corporation. Dryer assembly to be housed in 304 stainless steel or a die cast Aluminum housing finished in chrome plating or housing finished in epoxy paint that is incorporated with SteriTouch® antimicrobial additive. Motor shall be universal brush type operating at 34000 RPM and shall be thermally protected. Dryer shall be activated by an automatic active infrared sensor controlled by a circuit board with 1 second run-on time and 30 second vandal shut-off. Control board to have conformal coating. Dryer shall provide a 40°F temperature rise, and PC/ABS internal housing components to be V0 or V5 flame retardant. Hand dryers shall be listed under re-examination service of Underwriters Laboratories, Inc.

INSTALLATION

Airforce™ hand dryers require a dedicated 15 AMP circuit, and must be properly grounded. GFI circuit protection is recommended. One side of dryer should be mounted to a stud.

AIRFORCE™ FEATURES

High speed, fast 12 second dry time

Sound level of 84.5 dB

Extremely low power consumption at 1100 watts

Automatic infrared activation ensuring optimum hygiene levels

Drastically reduces the spread of harmful bacteria, mold and fungi

Available with a white, black or chrome cover, surface mounted or ADA compliant with a recessed kit

Sleek design prevents dirt from collecting and is easy to clean

WARRANTY
5 year limited

Drawings not to scale

ENVIRONMENTALLY FRIENDLY

Airforce™ is GreenSpec® listed. Products selected for the GreenSpec list are considered to be the top of class and environmentally preferable, based on USGBC Building Green's criteria. Airforce™ can help earn LEED credits based on EA Credit 1 for optimized energy performance.

STERITOUCH® ANTIMICROBIAL

Airforce™ utilizes SteriTouch® patented anti-bacterial technology. SteriTouch® protects from the build-up of germs, mold and bacteria and makes the dryer easy to clean.

SteriTouch® is an antimicrobial additive designed to reduce the growth of harmful organisms such as bacteria, mold and fungi, while remaining entirely safe for even the most sensitive applications.

SteriTouch® is effective against many organisms, including bacteria such as methicillin resistant staphylococcus aureus (MRSA), escherichia coli, pseudomonas aeruginosa, salmonella enteritidis and listeria monocytogenes, and molds such as aspergillus niger.

UNIVERSAL NOZZLES

All Model A dryers come with a fixed Universal nozzle that can be easily adjusted during installation (or thereafter) to a swivel nozzle. For specification purposes, a model with a "5" in the model number (indicating a fixed nozzle) is the same as a model without the "5" (indicating a swivel nozzle).

Example:
order an A5-974 if an
A-974 is specified

COVER MATERIALS FOR AIRMAX™ and MODEL A SERIES

CAST IRON COVERS

Cast Iron provides the ultimate in durability and vandal-resistance. The 1/4" thick cast iron with porcelain enamel construction makes this option suitable for areas such as train/bus stations, schools, theaters, airports, and prisons.

STEEL COVERS

They are both durable and economical. Grade 304 stainless steel covers are vandal resistant and offer a touch of elegance.

WORLD STONE COVERS

Provide a durable, cost effective option to traditional metal covers. Available for Model A and AirMax™, surface mounted, automatic hand dryers. Embedded with antimicrobial agents to promote hygiene. Material originally developed for use in high temperature, demanding aerospace and automotive applications.

SPECIFICATIONS

Nova 1® hand dryers shall be manufactured by or for Nova® Hand Dryers to include cover of die cast Aluminum with white epoxy enamel. Motor shall be thermally protected brush type with minimum 7500 RPM with a single shaft. Dryer shall deliver 134 cubic feet per minute of air volume (6400 LFM), and shall be activated by an infrared sensor, and controlled by a microprocessor that allows multi-voltage application (100 VAC to 240 VAC - 50 or 60 Hz). Dryer shall be surface mounted, and Nova 1® must not protrude more than 4 inches from the wall when hard-wired. Plug-in units shall be equipped with a 6 foot long cord and three-prong conductor plug, and shall include mounting bracket and hardware. Plug-in units available only in 120 VAC, 60 Hz for use with common wall outlets. Nova® Hand Dryer shall be listed under reexamination service of Underwriters Laboratories, Inc.

NOVA 2® HAND DRYERS

Nova 2® hand dryers are multi-voltage units (100 VAC to 240 VAC) that are suitable for light traffic areas and are quiet.

Nova 2® - 0930
Automatic Surface Mounted

NOVA 2® FEATURES
Surface mounted, automatic activation

Thermally protected motor, tamper resistant screws

Nova 2® has dual blowers for maximum output

Durable and vandal resistant.

WARRANTY

10 year limited, 5 year on sensor

SPECIFICATIONS

Nova 4® & Nova 5® hand dryers shall be manufactured by or for Nova® Hand Dryers to include a one-piece cover constructed of .20" thick cast iron (Nova 4®) finished in white acid-resistant porcelain enamel or .09" thick die cast aluminum finished in brushed chrome plating or epoxy coating (Nova 5®). Dryers shall be fitted with 360 degree revolving die cast aluminum nozzles finished in bright chrome plating. Surface-mounted covers shall be fastened by two flat-head, recessed tamper-resistant bolts to a heavy-gauge steel wall plate, which in turn shall be fastened to the wall or a wall box by four concealed mounting bolts. (For recessed dryers only: A steel wall box shall be furnished into which a complete base assembly shall be mounted). The dryer shall be equipped with 15 air intake slots (Nova 4®) or 30 air intake slots (Nova 5®). The fan shall be protected by an aluminum die cast grating fixed into the blower housing. The entire mechanism shall be internally grounded throughout. The motor shall be brushless, 1/10 H.P., 3200 RPM, thermally protected. The fan shall be a large single inlet centrifugal type contained in an aluminum die cast housing. It shall deliver 107 cubic feet per minute of air volume (4400 LFM) and shall be mounted directly on the motor shaft. The heating element of nichrome wire shall be mounted on the air intake. It shall be protected by an automatic resetting circuit breaker (25 AMP) which shall open whenever the air flow is cut off and shall close when the flow of air is resumed. The element shall produce an air temperature of 142 F at a 72 F ambient room temperature. The dryer shall be equipped with an infrared sensor which will allow the dryer to start automatically when hands are placed underneath the air nozzle, and to stop automatically when the hands are removed. For push button dryers (Nova 5® only), timer shall be micro-chip based and micro-switch activated. It shall be adjustable to allow for the required time cycle setting. Nova® Hand Dryers shall be listed under reexamination service of Underwriters Laboratories, Inc.

NO TOUCH™ & AIRSPEED™ HAND DRYERS

Airspeed™ and No Touch™ hand dryers shall be manufactured by or for World Dryer® Corporation to include housing of .08" thick die cast aluminum. Front panel shall be in ebony gloss for the NoTouch™ and brushed aluminum for the Airspeed™. Housing to be finished with chrome plating or white epoxy paint. Motor shall be of shaded pole (brushless) type operating at maximum 3200 RPM at rated load, delivering 120 cubic feet per minute of air volume (5300 LFM). Timer shall be electromechanical cam style with 25 amp rated switch to operate dryer for 30 seconds on push button units. No Touch™ dryers shall be activated by means of an infrared emitting/ receiving electronic control device. Recessed kits will include a 16 gauge steel wall-mounting box. Hand dryers shall be listed under reexamination service of Underwriters Laboratories, Inc.

INSTALLATION

Hand dryers require a dedicated 20 AMP circuit, and must be properly grounded. GFI Circuit protection is recommended. One side of dryer should be mounted to a stud.

ELECTRIC-AIRE™ LE HAND DRYERS

LE hand dryers are suitable for light traffic areas and are quiet.

LE FEATURES

Surface mounted, automatic activation

Multi-voltage (100 to 240 VAC)

Thermally protected motor, tamper resistant screws

Sound level of 76dB

WARRANTY 2 year limited

SPECIFICATIONS

LE hand dryers shall be manufactured by or for World Dryer to include cover of die cast Aluminum with white epoxy enamel. Motor shall be thermally protected brush type with minimum 7500 RPM with a single shaft. Dryer shall deliver 134 cubic feet per minute of air volume (6400 LFM), and shall be activated by an infrared sensor, and controlled by a microprocessor that allows multi-voltage application (100 VAC to 240 VAC - 60 Hz). Dryer shall be surface mounted. Hand Dryer shall be listed under reexamination service of Underwriters Laboratories, Inc.
